INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

We have not entered into long term agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with them. The loss of one or more of these significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Since, we have not entered into any formal arrangements with our customers, we cannot initiate legal actions against them, in the event of breach of arrangement or understanding which was mutually decided. Occurrence of any such events could adversely affect our business, cash flows, results of operations and financial condition.

2. *Our revenues largely depend on acceptance of the bids submitted to the Government and Government Departments. Our performance could be affected in case majority of the bids are not accepted / awarded to us or we quote a lower bid value.*

Our business is substantially dependent on construction, interior & structural repairs / restoration / retrofitting projects undertaken by Government Authorities / Government departments/ Public Sector Undertaking and other entities funded by the Government. The contracts awarded by state and local Government authorities or entities funded by the Government are tender based. We compete with various other engineering companies while submitting the tender to Government and other agencies. However, the Projects are awarded considering the competitive bidding processes and satisfaction of certain prescribed pre-qualification criteria. Once the prospective bidders satisfy the pre-qualification criteria of the tender, the project is usually awarded based on the price of the contract quoted by the bidder. In case, we are not qualified or are not amongst the lowest bidders, we stand to lose the business. We cannot assure that any of the bids we submit would be accepted / awarded to us; therefore, our ability to procure the contracts by bidding at the lowest rates is crucial for our revenues. Further our business and operations maybe impacted as a result of change in Government scaling back of Government Policies or initiatives, changes in Government or external budgetary allocation, or insufficiency of funds, which can adversely affect our business, financial condition and results of operations. In the past three financial years, no incidents have occurred in which our business was materially adversely affected by the absence of contracts awarded by state and local government authorities or entities funded by the government; However, we cannot provide assurance that such incidents may not occur in the future, potentially impacting our business operations. Furthermore, we cannot guarantee that if any such incidents, should they arise, they will not adversely affect or disrupt our business operations

3. *Our construction, interior / structural repairs & restoration/ retrofitting projects may be delayed, modified or cancelled for reasons beyond our control which may materially and adversely affect our business, financial condition and results of operation.*

Project delays, modifications or cancellations in projects may occur from time to time due to either a client's requirements or our default or any incidents of force majeure or legal impediments. In case of any delays in the project we may incur significant additional costs and our clients may seek liquidated damages due to our failure to meet the requisite deadlines in the project or even terminate the construction contract totally or refuse to grant

us any extension. The schedule of completion may need to be reset and we may not be able to recognize revenue if the required percentage of completion is not achieved in the specified timeframe.

Further, in case of lump-sum contract or fixed price contracts, prices of the contracts are based on the cost to be incurred and the schedule of implementation which are based on management estimates and assumptions. These estimates may prove to be inaccurate with the execution of the projects. As a result, our future earnings may be different from the amount estimated by the management.

4. The geographical concentration of our customer base may restrict our operations and adversely affect our business, results of operations, and financial conditions in the future.

Our Company presently has a concentration of customer base and revenue majorly in the state of Maharashtra. The revenue earned in the state in March 2025, March 2024, and March 2023 is INR 12047.27 (96.55%), INR 8946.38 Lacs (88%) and INR 4,769.49 Lacs (76%) respectively for more details refer the “chapter titled” “Our Business” on page no 144. We are aware that if a company's customer base is heavily concentrated in a specific region, it becomes more vulnerable to economic changes, local market conditions, or geopolitical events that may affect that particular area. Further, economic downturns could disproportionately impact the purchasing power of customers in that region.

Our concentration of customer base in the state of Maharashtra makes our operations susceptible to local and regional factors, such as accidents, system failures, economic, and weather conditions, natural disasters, demographic and population changes, and other unforeseen events and circumstances that may disrupt or restrict the exchange of information within the state that may adversely affect the workflow and the results of operations of the Company in the future.

5. Increase in competition in the Indian real estate sector may adversely affect profitability.

An increase in competition within the Indian real estate sector may adversely impact the company's profitability. As more players enter the market or existing developers expand their presence, there may be greater pressure on pricing, project delivery timelines, and customer expectations. This heightened competition can lead to reduced margins, especially if the company is required to offer additional incentives or lower prices to attract buyers and tenants. Furthermore, clients may prefer developers with a longer track record, more advanced technology, or larger marketing budgets, making it more challenging for the company to maintain or grow its market share. Sustaining profitability in such a competitive environment requires continuous improvement in quality, innovation, and cost-efficiency.

6. Our top ten suppliers contribute significant part of our purchases. Any loss of business with one or more of them may adversely affect our business operations and profitability.

Our top ten suppliers contributed approximately 42.94%, 39.03% and 41.01% of our total purchases for the financial year ended March 31, 2025, March 31, 2024 and March 31, 2023 based on Restated Financial Statements. However, our top suppliers may vary from period to period depending on the demand-supply mechanism and thus the supply process from these suppliers might change as we continue to seek more cost-effective suppliers in the normal course of business. Since our business is concentrated among relatively few significant suppliers, we could experience a reduction in our purchases and business operations if we lose one or more of these suppliers, including but not limited on account of any dispute or disqualification.

While Company believes that they have maintained good and long-term relationships with our other suppliers too, there can be no assurance that we will continue to have such long-term relationships with them as we don't have any long-term agreements. We cannot assure that we shall do the same quantum of business, or any business at all, with these suppliers, and loss of business with one or more of them may adversely affect our purchases and business operations. In the past three years no such instances occurred in the Company where we

have failed to procure raw material from our top 10 suppliers at desirable price. Further if we fail to procure raw material at desirable price it can impact our business operation and out profitability.

7. Our Company, Promoters, and Directors are not involved in certain legal and regulatory proceedings except as disclosed below. Any future litigation may have a material adverse effect on our business.

Our Company, Promoter and Directors are not involved in any certain legal proceedings except as disclosed below. The summary of outstanding litigation in relation to our Company Promoter and Directors as on the date of this Prospectus, have been provided below in accordance with the materiality policy adopted by our Board. However, any future litigation may have a material adverse effect on the business of the Company. For details kindly refer the chapter titled “Outstanding Litigation and Material Developments” beginning on page no. 278 of this Prospectus.

***The company is currently facing the following Show Cause Notices pending adjudication before the Assistant Commissioner, Division-X, GST: Show Cause Notice No. 07/AC/CGST/M-W/D-X/Mahendra Realtor/22-23 dated 20th May 2022, and Show Cause Notice No. 06/AC/CGST/M-W/D-X/Mahendra Realtor/22-23 dated 20th May 2022, both pertaining to alleged contraventions under the Service Tax Act for the financial year 2016-17 and 2017-18. Additionally, Show Cause Notice No. 18/ADC/CGST-W/MR&I/2022-23 dated 13th May 2022 has also been issued, raising demands related to compliance failures and potential revenue shortfall. The aggregate contingent liability arising from these proceedings is estimated to exceed Rs. 1 crore, and the outcome of these cases could have significant financial implications for the company.*

Note: The Company has received a Show Cause Notice (“SCN”) dated July 15, 2025 from the Jawaharlal

Nehru Port Authority (“JNPA”), alleging material misrepresentation, false information, fraudulent practice to influence bidding process in the bid submitted by the Company in response to a Request for Proposal (“RFP”). The SCN primarily alleges that the Company failed to disclose a pending criminal case before the District Court, Raigad, Alibaug (SCC/908/2024; FIR No. 282/2023, Alibaug PS), registered under Sections 288 and 337 of the Indian Penal Code, relating to negligent conduct endangering life and causing hurt. Additionally, the SCN points to a discrepancy between the number of ongoing projects disclosed in the bid (26 projects) and those stated in the Draft Red Herring Prospectus (“DRHP”) filed with NSE on February 20, 2025 (67 projects), which has been treated as a material misrepresentation. Based on these grounds, it may result in forfeiture of bid and/or performance security, and debarment from future JNPA tenders for two years. While the Company had initially challenged the SCN through a writ petition, the same was withdrawn with liberty to challenge any adverse final order. As on date, there is no ongoing litigation in this regard and the matter does not qualify as a contingent liability. However, any adverse outcome could impact the Company’s eligibility for future government contracts, cause reputational harm, and invite regulatory scrutiny. Although the Company believes that the matter will not materially affect its financials or business operations, there can be no assurance of the final outcome, and any adverse developments may have a material impact on the Company’s business prospects and investor perception.

- 8. Our business is manpower intensive and we are dependent on the supply and availability of a sufficient pool of contract labourers from sub-contractors at our project locations. Unavailability or shortage of such a pool of contract labour or any strikes, work stoppages, increased wage demands by workmen or changes in regulations governing contractual labour may have an adverse impact on our cash flows and results of operations.**

Our business is manpower intensive and we are dependent on the availability of a sufficient pool of contract labour from our sub-contractors to execute our projects. The number of contract labourers employed by us varies from time to time based on the nature and extent of work contracted to us and the availability of contract labour. We may not be able to secure the required number of contractual labourers required for the timely execution of our projects for a variety of reasons including the possibility of disputes with sub-contractors, strikes, less competitive rates to our sub-contractors as compared to our competitors or changes in labour regulations that may limit the availability of contractual labour. We engage labour at our site through contract labour daily wages labour those might be less committed or consistent, leading to higher absenteeism and disruptions in operations. We are subject to laws and regulations relating to employee welfare and benefits such as minimum wage, working conditions, employee insurance, and other such employee benefits and any changes to existing labour legislations, including upward revision of wages required by such state governments to be paid to such contract labourers, limitations on the number of hours of work or provision of improved facilities, such as food or safety equipment, may adversely affect our business and results of our operations. In the past three financial years no such incident has been occurred

There can be no assurance that disruptions in our business will not be experienced if there are strikes, work stoppages, disputes or other problems with sub-contractors or contract labourers deployed at our projects. This may adversely affect our business and cash flows and results of operations. However, there are no past instances in the company to experience the same. In the past three financial years no such incident has been occurred

Set out below are the details of the attrition rate of our employees for the Financial year 2024-25, 2023-24, and 2022-23:

Particulars	31.03.2025	31.03.2024	31.03.2023
No. of employees at the beginning of the period	78	70	74
No. of employees at the end of the period	77	78	70
Employees left during the year	27	32	39
Attrition Rate (%)	35.06%	43.24%	54.17%

9. *The profits from our projects are difficult to predict and are not comparable at all.*

Profits from a construction, interior / repairs & restoration projects may vary as the same are dependent on various factors such as the stage and size of the project, the scheduled commencement date, the price and supply of raw materials and project delays. The scheduled commencement dates for our projects are estimates based on current expectations and market conditions, which could change significantly. Similarly, our revenue may also differ significantly from period to period due to factors such as the number of new projects, delays or difficulties in expanding our business, accurate estimates of resources and time required to complete. In addition, since we record revenues using the percentage of completion method, our revenues and profits may vary significantly during different financial periods, and certain periods are not indicative of our financial position for the year, and may be significantly below the expectations of the market, analysts and investors.

For further details, see the chapter titled “Our Business” and “Financial Information of the Company” on page no.144 & 227 of this Prospectus.

10. *Projects undertaken through a joint venture may be delayed on account of the performance of the joint venture partner or, in some cases, significant losses from the joint venture may have an adverse effect on our business, results of operations and financial condition*

We undertake contracts independently or whenever required, through our project-specific joint ventures with other infrastructure and construction entities when a project requires us to meet specific eligibility requirements in relation to certain large projects, including requirements relating to particular types of experience.

The projects for which we bid under the joint venture; and the completion of such contracts also depend on the performance of our joint venture partner for more details of joint ventures please refer Chapter titled “Our Business” on page no. 144.

While entering into the joint venture agreement with our project-specific joint venture partners, we set out the terms and conditions of the said Joint Venture including the roles and responsibilities. Further, if the joint venture partner fails to perform its obligations as per the requirements of the contract, it could result in breach of the terms of the contract awarded to the joint venture and we may be required to pay penalties and/or liquidated damages. Further, given that the liability of joint venture partners is joint and several, in the event our joint venture partner fails to perform its obligations, we would be liable for the completion of the entire project awarded to such joint ventures. Any failure to effectively protect ourselves against risks for any of these reasons could expose us to costs and potentially lead to material losses, which could adversely affect our business, results of operations and financial condition. However, there have been no incidents in the past three financial years where our joint venture partner failed to perform its obligations, thereby making us liable for the completion of the entire project. Notwithstanding the foregoing, we cannot assure you that such incidents will not occur in the foreseeable future.

Any disputes that may arise between us and our joint venture partners may cause delays in completion or the suspension of the project. In the past, we have not experienced disputes with our joint venture partners. However, we cannot assure that our relationships with our joint venture partners in the future will be amicable or we will have any control over their actions. Further, we may not be successful in finding the required joint venture partners for our bids due to which we may not be able to bid for a project.

11. *Our business may be affected by severe weather conditions or other natural disasters and our insurance coverage may not be adequate.*

Our business activities may be materially affected by severe weather conditions such as heavy rainfall, cyclones etc, which may force us to either temporarily stop the construction work or evacuate from the project site, replace damaged equipment, or postpone the deliveries of material to our worksites. Heavy or sustained rainfalls or other extreme weather conditions such as cyclones could result in severe damage to our projects and

equipment. During periods of curtailed activity due to severe weather conditions or natural disasters, we may continue to incur our fixed operating expenses but our revenues from operations may be delayed or reduced. In the past three financial years, there have been instances where delays in revenue and an increase in fixed costs occurred due to natural phenomena, such as rainfall. While we are actively taking measures to minimize such losses, we cannot assure you that we will be able to fully mitigate the impact of fixed cost increases or delays in revenue caused by natural phenomena in the future.

12. Some shareholders of the company transferred their shareholding through a gift; however, the gift deed was not executed on the requisite stamp paper as mandated by applicable stamp duty laws.

Some shareholders of the company transferred their shareholding through a gift; however, the gift deed was not executed on the requisite stamp paper as mandated by applicable stamp duty laws. The failure to execute a gift deed on the required stamp paper exposes the parties involved to several risks. First, the gift deed may be considered legally invalid, as it does not comply with the necessary stamp duty requirements. This could result in the transfer of shares not being recognized by the company or in any legal proceedings. Additionally, the lack of proper stamping may lead to legal disputes, with the gift deed potentially deemed inadmissible as evidence in court. This could undermine the case for the transfer. Moreover, failure to pay the correct stamp duty could result in penalties or fines, with the parties involved required to pay back taxes, interest, and additional fees. The absence of a properly executed gift deed could also complicate the assessment of gift tax or other related tax obligations, leading to unforeseen tax liabilities and penalties for non-compliance.

13. The Company derives a significant portion of its revenue from contracts with government departments and public sector undertakings, which exposes it to various risks associated with such dependency.

The Company derives a significant portion of its revenue from contracts with government departments and public sector undertakings, which exposes it to various risks associated with such dependency. Changes in government policies, budgetary allocations, or political priorities may lead to reduced or delayed spending in the sectors where the Company operates, adversely impacting future business prospects. Additionally, government procurement processes are often subject to bureaucratic delays and complex compliance requirements, which can result in delayed payments and extended receivables cycles, thereby affecting the Company's liquidity and working capital. There is also a risk of unilateral termination or non-renewal of contracts by government entities, which may occur without sufficient notice or compensation, disrupting ongoing operations. Moreover, shifts in procurement policies—such as increased preference for local suppliers, public sector units, or revised eligibility criteria—could restrict the Company's ability to secure future contracts. Political and administrative changes may also influence procurement decisions, introducing an element of unpredictability in the business environment. Any failure to meet contractual obligations or comply with regulatory requirements could expose the Company to penalties, blacklisting, or reputational damage, all of which could have a material adverse effect on its financial and operational performance.

14. The company is currently facing the following Show Cause Notices pending adjudication before the Assistant Commissioner, Division-X, GST: Show Cause Notice No. 07/AC/CGST/M-W/DX/Mahendra Realtor/22-23 dated 20th May 2022, and Show Cause Notice No. 06/AC/CGST/MW/D-X/Mahendra Realtor/22-23 dated 20th May 2022, both pertaining to alleged contraventions under the Service Tax Act for the financial year 2016-17 and 2017-18. Additionally, Show Cause Notice No. 18/ADC/CGST-W/MR&I/2022-23 dated 13th May 2022 has also been issued ("SCNs") raising demands related to compliance failures and potential revenue shortfall. The aggregate contingent liability arising from these proceedings is estimated to exceed Rs. 1 crore, and the outcome of these cases could have significant financial implications for the company.

The company faces significant financial, legal, and operational risks due to the pending Show Cause Notices (SCNs). Financially, there is a potential liability exceeding ₹1 crore, which could impact cash flow, working capital, and financial statements, potentially requiring recognition as a contingent liability. If the adjudication results in an adverse order, the company may have to bear substantial tax dues, interest, and penalties. From a

legal and regulatory perspective, there is a risk of adverse adjudication, leading to recovery proceedings, prolonged litigation, and increased legal costs. Additionally, involvement in tax disputes could harm the company's reputation with regulatory authorities and stakeholders. Operationally, the company may face heightened compliance scrutiny, further audits, and possible business disruptions if authorities initiate recovery proceedings or attach assets. The risk of accruing interest and penalties remains high, especially if liabilities are confirmed, with additional penalties possible for willful misstatements or suppression of facts. Furthermore, an adverse ruling could set a precedent, impact the company's future tax positions and increase the likelihood of additional SCNs for other financial years.

15. *The company experiences a high attrition rate due to the nature of its operations in the civil construction industry.*

One key risk factor associated with operating in the civil construction industry is workforce instability due to the project-based nature of employment. The reliance on project-specific tenders means that workforce requirements fluctuate, leading to frequent hiring and layoffs, which can create challenges in retaining skilled labor. Additionally, the industry's historically high attrition rates pose a risk to productivity and project continuity, as employees may leave for better opportunities, particularly during peak construction seasons. Seasonal variations and economic conditions further impact labor availability, making workforce planning unpredictable. Moreover, competition for skilled workers can drive up labor costs, potentially affecting project profitability and timelines. If not managed effectively, these workforce dynamics could lead to delays, increased recruitment and training expenses, and potential disruptions in project execution.

16. *We engage third-party sub-contractors to perform parts of our contract or provide services or manpower.*

We engage third-party sub-contractors to perform parts of our contract or provide services or manpower. While there have been no instances in the past of delay in the performance of duties by our subcontractors, we cannot ensure that there will be no future delays in the performance of duties by our subcontractors, which may cause a delay in the completion of our projects. We may also be exposed to risks relating to the ability of the contractors to provide quality services, equipment and supplies for the execution and completion of our projects. Further, while we may sub-contract the work and may be indemnified by the sub-contractor for any penalties or liquidated damages suffered by our Company due to their default, we may still be liable to pay damages or penalties for any defects in design and shortcomings in the quality of the work in our projects during their tenure and defect liability period. In addition, we can make no assurance that such sub-contractors will continue to hold or renew valid registrations under the relevant labour laws in India or be able to obtain the requisite approvals for undertaking such works. While the aforementioned events have not occurred in the past in the last three financial year except mentioned hereinbelow*, we cannot assure you that such events will not occur in the future and will not affect our business operations, results of operations and financial condition.

**Our company has filed the case against Sanjay Mistry, Proprietor of M/s Mistry Brothers, for committing criminal offenses of fraud, cheating, and criminal breach of trust by making false promises and representations, thereby inducing the Complainant to part with valuable security in the form of advances paid through bank transfers and the value of materials supplied for the execution of interior work under the work order dated 18th October 2018. The said work was part of a prestigious project for the construction of SVPIMSR Hospital, a multi-story multi-specialty building in Ahmedabad, awarded by the Ahmedabad Municipal Corporation, with an expectation of world-class standards and timely completion for inauguration by the Hon'ble Prime Minister, Shri Narendra Modi. As a result of the accused's criminal acts, the Complainant suffered a total loss exceeding Rs. 1.69 crore, comprising Rs. 1.09 crore paid to M/s Mistry Brothers, a penalty of Rs. 40,36,090/- imposed by the Ahmedabad Municipal Corporation, and a loss of GST input tax benefits amounting to over Rs. 9.18 lakh. The Complainant has approached the Hon'ble Court, seeking directions under Section 202 of the Cr.P.C. to the Senior Police Inspector of Malad Police Station to investigate the matter thoroughly, file an inquiry report, and take appropriate legal action against the accused in accordance with the law. The matter was last listed on 20.12.2024. The next date in the matter is 07.11.2025.*

If our sub-contractors are unable to perform in accordance with their commitments on time or meet the quality standards required, our ability to complete projects on time or at all could be impaired. Further, any disputes between our sub-contractors and their employees, or our sub-contractor's failure to satisfy regulatory obligations towards their workers, where we are registered as the principal employer, may also result in disruptions in our operations, or in increased compliance costs for us. While such events have not occurred in the past, any future occurrence of such events may adversely affect our ability to complete a project in a timely manner. Further, if a sub-contractor becomes insolvent, we may be unable to recover damages or compensation for defective work and we may incur additional expenditure as a result of correcting any defective work. While, none of our sub-contractors are insolvent or have been declared insolvent in the past, the occurrence of any such events in the future may have an adverse effect on our reputation, cash flows, business, financial condition, results of operations, and prospects.

17. We may not be able to realise the amounts reflected in our Order Book which may materially and adversely affect our business, prospects, reputation, profitability, financial condition and results of operation.

As of June 30, 2025, our Company's Order Book was 18,069.11 Lakhs. Future earnings related to the performance of projects in the order book may not be realized and although the projects in the order book represent business that is considered firm, cancellations or scope reduction or schedule adjustments may occur. We may also encounter problems executing the project as ordered, or executing it on a timely basis. Moreover, factors beyond our control or the control of our clients may postpone a project or cause its cancellation, including delays or failure to obtain necessary permits, authorizations, permissions, right-of-way, and other types of difficulties or obstructions. Due to the possibility of cancellations or changes in the scope and schedule of projects, resulting from our clients' discretion or problems we encounter in project execution or reasons outside our control or the control of our clients, we cannot predict with certainty when, if or to what extent a project forming part of our order book will be performed. Delays in the completion of a project can lead to clients delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such project. Even relatively short delays or surmountable difficulties in the execution of a project could result in our failure to receive, on a timely basis or at all, all payments due to us on a project.

Any delay, reduction in scope, cancellation, execution difficulty, payment postponement or payment default in regard to our order book projects or any other incomplete projects, or disputes with clients in respect of any of the foregoing, could adversely affect our cash flow position, revenues and earnings.

18. There have been instances of delayed filings and erroneous filings of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 2013 to ROC.

In the past, there have been certain instances of delays in filing statutory forms which have been subsequently filed by payment of an additional fee as specified by ROC.

The challans of Annual Return (MGT -7) were available from the financial year 2015-16 and Challan for Financial Statement (AOC-4) are available from financial year 2015-16.

No show cause notice in respect to the above has been received by our Company till date and no penalty or fine has been imposed by any regulatory authority in respect to the same. It cannot be assured, that there will not be such instances in the future or our Company will not commit any further delays in relation to its reporting requirements, or any penalty or fine will not be imposed by any regulatory authority in respect to the same. The happening of such event may cause a material effect on our results of operations and financial position. It is hereby provided that as part of strengthening internal controls, the company has implemented a comprehensive compliance calendar specifically for ROC related filings, to ensure timely and accurate compliance, a dedicated Compliance Officer has been appointed to oversee and monitor all statutory requirements.

19. We have substantial working capital requirements and may require additional financing to meet working capital requirements in the future. A failure to obtain such additional financing at all or on terms favourable to us could have an adverse effect on our results of operations and financial condition.

The nature of our business requires significant amounts towards working capital requirements. In many cases, large amounts of our working capital are required for Deposits (Earnest Money Deposit/ Additional Security Deposit / Performance Guarantee / Initial Security Deposit) to be paid for getting the works, finance the purchase of raw materials or payments of wages and contractors for the timely execution of the work. Further, substantial amounts of our working capital may get temporarily locked-up in terms of work-in-progress or dues owed to us by our debtors, which may take significant amounts of time to become available for use again. Our working capital requirements may increase if the payment terms in our agreements include reduced advance payments or longer payment schedules which may be due to unavailability of fund by our clients. These factors may result, or have resulted, in increases in the amount of our receivables and short-term borrowings. There can be no assurance that we will be able to continue to access funds, including by way of short-term borrowings, whether on acceptable terms or at all, to continue to fund our borrowings or that our receivables will continue to be sufficient to cover our working capital requirements. Similarly, there can be no assurance that, we will be able to get the receivables from the Client on time, there can be significant and exorbitant delays in getting receivables on account of availability of funds by the Client and this can badly affect the working of the company. In past three financial year no such incident has been occurred.

There can be no assurance that we will be able to improve or reduce our working capital cycle or that such a working capital cycle will not increase. Continued increase in our working capital requirements without adequate availability of financing may have an adverse effect on our cash flows, financial condition and results of operations. Further, our working capital requirements are based on management estimates, which are in turn subject to certain assumptions. Any change or cost escalation can significantly increase the cost of the objects of the Issue.

20. Our working capital requirements, towards which we intend to deploy 3,040 lakhs from the Net Proceeds, are based on certain assumptions. Any change in working capital requirements on account of such assumptions may materially adversely affect our results of operations and profitability.

We propose to utilise 3,040 lakhs from the Net Proceeds to fund working capital requirements of our Company. The working capital requirements have been reached at on the basis of certain assumptions, including historical holding levels of raw materials and trade receivables. In particular we have assumed that holding period for our inventories, i.e., raw materials and work-in-progress and trade receivables will not undergo any change in the short term, while the holding period for trade payables and other current liabilities are expected to reduce based on improved liquidity. For further details of the working capital requirements of the Company, please see “Objects of the Issue” on page no. 99. of this Prospectus. Any deviations from our estimates will cause our estimates to be incorrect and our working capital requirements may be subject to change on the basis of such estimates being incorrect or inaccurate. Any such deviations in our estimates and the actuals may cause our working capital requirements to differ significantly from the estimates stated herein, including falling short of our actual working capital requirements for future period. Any such shortfall in working capital requirements may have material adverse effect on our results of operations and profitability.

21. The Company operates with a single unit of each type of machinery, which increases risk of machinery downtime due to maintenance and inoperability.

The Company operates with a single unit of each type of machinery, which increases the risk of operational disruptions due to maintenance, unexpected breakdowns, or required repairs. Any prolonged inoperability of essential machinery could impact production schedules, lead to delays in project completion, and potentially result in financial losses. Additionally, sourcing spare parts or specialized technical support may pose challenges, further extending downtime. The Company seeks to mitigate these risks through preventive maintenance programs and contingency planning; however, the possibility of unforeseen mechanical failures remains a concern.

22. The Company is significantly dependent on the State of Maharashtra for the procurement of a substantial portion of its raw materials.

(Amount in Lakhs)

Particulars	2022-23	%	2023-24	%	2024-25	%
<i>Maharashtra</i>	<i>1,312.16</i>	<i>84.00%</i>	<i>1,453.80</i>	<i>79.91%</i>	<i>2781.42</i>	<i>88.42%</i>

The Company is significantly dependent on the State of Maharashtra for the procurement of a substantial portion of its raw materials. Any adverse developments in the region, including but not limited to natural disasters, adverse weather conditions, political instability, changes in state policies, disruptions in transportation infrastructure, or regulatory restrictions, may adversely impact the availability and cost of raw materials. Such disruptions could result in production delays, increased operational costs, and could materially affect the Company’s business operations, financial condition, and results of operations.

23. Redevelopment projects are subject to certain risks involving existing tenants and applicable Government regulations.

Redevelopment projects undertaken by a renovation and restructuring company involve certain risks that may affect the timely execution and financial outcomes of the project. One such risk arises from the presence of existing tenants or occupants, whose cooperation may be necessary for relocation or temporary accommodation during the redevelopment process. While mechanisms for tenant rehabilitation are often in place, unforeseen resistance or delays in negotiations can impact project schedules. Additionally, these projects are governed by a complex framework of government regulations, including building codes, zoning laws, and redevelopment-specific policies. Compliance with such regulations requires careful planning and coordination with multiple authorities. Any changes in these regulatory frameworks during the project lifecycle may lead to revisions in

design, additional costs, or delays in obtaining mandatory approvals. Though not the primary concern, these factors collectively contribute to the overall risk profile of redevelopment initiatives.

24. Redevelopment projects require compliance which inter alia involves tenant settlement, approvals from MHADA & MCGM, construction of the tenant and saleable portion units.

Redevelopment projects require strict compliance with various legal and regulatory processes, which can pose challenges and risks to timely execution. These projects typically involve settling with existing tenants, which includes negotiating terms for relocation, compensation, or reallocation of space. Additionally, approvals are required from multiple government authorities, including bodies like MHADA (Maharashtra Housing and Area Development Authority) and MCGM (Municipal Corporation of Greater Mumbai). These approvals can be time-consuming and subject to changing regulations or policy updates. Furthermore, the redevelopment process includes the construction of both the tenant-rehabilitation units and the saleable portion of the project. Any delays or complications in fulfilling these obligations—whether due to coordination issues, regulatory hurdles, or construction-related challenges—can impact project timelines, increase costs, and affect overall profitability.

25. The COVID-19 pandemic adversely impacted the business operations and financial performance, and the Company may be similarly impacted in the future.

The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations. Since first being reported in December 2019, the outbreak of COVID-19 has spread globally. The World Health Organization declared the outbreak of COVID-19 to be a public health emergency of international concern on January 30, 2020, and a global pandemic on March 11, 2020. The COVID-19 pandemic has had, and any future pandemic or widespread public health emergency could have, repercussions across regional and global economies and financial markets. The outbreak of COVID-19 in many countries, including India has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally. The global impact of the outbreak has been rapidly evolving. As cases of COVID-19 have continued to be identified in additional countries, many jurisdictions, including the governments of India, have reacted by instituting restrictive measures including invoking lock downs and quarantines, requiring the closure of non-essential businesses and placing restrictions on the types of businesses that may continue to operate, mandating restrictions on travel, implementing “shelter-in-place” rules and “stay-at-home” orders, and enforcing remote working regulations. No prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy or localized lockdowns remain unknown.

On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Our business was determined to be operating in an essential industry, which allowed us to continue our operations after the introduction of the lockdown in India, subject to certain adjustments in working patterns. There can be no assurance that there will not be any material impact on our operations if the outbreak of COVID-19 is not effectively controlled. Although some restrictions have been eased, it is not yet clear when the lockdown conditions will be fully lifted in India. Further, although we were declared an essential business and were able to adjust our business to continue operating during the lockdown, there can be no assurance that further restrictions will not be introduced or that we will continue to retain such essential status. Further, we may be required to quarantine employees that are suspected of being infected of COVID-19, as well as others that have come into contact with those employees or shut down our manufacturing facilities as a health measure, which could have an adverse effect on our business operations or result in a delay in the production and supply of products to our customers in a timely manner. If any of our suppliers are affected by COVID-19 to the extent our supply chain is disrupted, this may affect our ability to meet the demand of our customers. The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our

business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the disruptions or restrictions on our employees' and suppliers' ability to work and travel; volatility in foreign exchange rates; any extended period of remote work arrangements; and strain on our or our customers' business continuity plans, and resultant operational risk. The COVID-19 pandemic, or any future pandemic or widespread public health emergency could therefore materially and adversely impact our business, financial condition, cash flows and results of operations.

26. Changes in technology may affect business by making the construction and development capabilities less competitive or obsolete.

Changes in technology may pose a risk to the business by making existing construction methods, materials, or project management tools less efficient or outdated compared to newer industry practices. As innovation continues to reshape the construction and real estate sectors, companies that fail to adopt modern technologies—such as advanced design software, energy-efficient materials, or automation in construction—may struggle to stay competitive. This could lead to increased project costs, longer timelines, or reduced client interest, especially if competitors are offering more advanced, cost-effective, or sustainable solutions. Keeping up with technological advancements requires ongoing investment and adaptability, and any delay in doing so may impact the company's ability to win projects or maintain profitability.

27. We do not own the premises in which our branch office is located and the same is on Consent of owner. Any termination of such Consent and attachment by Property Owner could adversely affect our operations.

Our branch office is on Consent of owner. The detail of our property leased by us is as follows:

S. No.	Address	Details	Date of agreement	Usage	Owned/Leased	Name Transferer/ Lessor	Validity
1.	House No.69, Flat No.1, Bhagwan Nagar, Near Durga Dairy, New Delhi, Delhi, 110014	Consent has been given to operate the office	January 21, 2021	Branch office	NA	Mrs. Bhanumati Devi	-

Note: Branch office of the company situated at Shop No. 55, foundation tower plot no. 20, Sector 11, CBD Belapur, Navi Mumbai has been surrendered.

For details, please refer to “**Our Business Overview- Land & Properties**” page no. 144 of this Prospectus.

Our Delhi office i.e. House No.69, Flat No.1, Bhagwan Nagar, Near Durga Dairy, New Delhi, Delhi, 110014 is operated on the basis of the consent to operate received from the owner of the company. Operating the Delhi office based on the owner's consent to operate poses several risks, including legal, financial, operational, and reputational concerns. Legally, the absence of a formal lease or ownership document could lead to regulatory scrutiny, eviction risks, and potential zoning violations, resulting in penalties or forced shutdowns. Financially, uncertain operating costs and the possibility of sudden rent hikes could strain resources, while any investments made in office setup or renovations may be lost if the owner withdraws consent. Additionally, legal disputes related to property rights could expose the business to fines or claims. Operationally, the lack of a formal agreement leaves the business vulnerable to disruptions if the owner revokes permission, potentially impacting business continuity and employee safety. Without proper workplace compliance, there could also be risks related to labor laws and regulatory obligations. Reputational risks arise from the perception of an unstable operating arrangement, which could affect client confidence, investor trust, and overall brand image, particularly if legal issues become public.

28. Business and profitability are significantly dependent on the performance of the real estate market generally in India.

The business and profitability of a renovation and restructuring company involved in redevelopment projects are closely tied to the overall performance of the real estate market in India. Factors such as demand for residential and commercial spaces, property prices, interest rates, and buyer sentiment play a crucial role in determining the success of redevelopment projects, particularly the saleable portion. If the real estate market experiences a slowdown due to economic conditions, policy changes, or oversupply in certain areas, it can directly affect sales velocity and pricing. This, in turn, may lead to longer project completion cycles, reduced cash flows, and pressure on profit margins. As a result, fluctuations in the real estate sector can have a significant impact on the company's revenue and financial health.

29. Some of the Ongoing Projects will require obtaining approvals or permits, and the Company would be required to fulfil certain conditions precedent in respect of some of them.

Some of the ongoing projects will require the Company to obtain various approvals, licenses, clearances, and permits from regulatory and governmental authorities, and to fulfil certain conditions precedent. There is no assurance that such approvals or permits will be obtained in a timely manner, or at all, or that the required conditions precedent will be met within the expected timeframes. Any delay, denial, or imposition of onerous conditions in obtaining these approvals or satisfying these conditions could adversely affect the implementation of the relevant projects, leading to cost overruns, project delays, or even cancellations. This may, in turn, materially and adversely impact the Company's business, financial condition, results of operations, and future prospects.

30. No material update in the Order Book subsequent to DRHP of the company due to the sensitive information.

This Prospectus substantially contains the same information as disclosed in the Draft Red Herring Prospectus ("DRHP") filed with Stock Exchanges in respect to the Order Book of the Company. The Company has not incorporated any material updates, in the Order Book and details of completed order subsequent to the filing of the DRHP, due to instance of misuse of sensitive information by competitors.

Accordingly, investors are advised to consider that certain events or developments that may have occurred after the date of the DRHP may not be reflected in this Prospectus. There can be no assurance that the absence of such updated disclosures will not have a bearing on the investment decision or the valuation of the Company.

While we believe that all our related party transactions have been conducted on an arm's length basis, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. 32. The Company has not filed the forms MR-1 and MGT-14 for the appointment of managing director in the financial year 2014-15 and the MGT-14 for the re-appointment of managing director.

Such negative cash flows lead to a net decrease in cash and cash equivalents. Any negative cash flow in future could adversely affect our operations and financial conditions and the trading price of our Equity Shares.

35. The company has credit ratings of Bank Loan Ratings of Long-Term Rating ACUITE BB- | Reaffirmed | Issuer not co-operating and Short-Term Rating ACUITE A4+ | Reaffirmed | Issuer not co-operating as

per report of Acuite Rating & Research dated November 08, 2024 and Bank Loan Ratings of Long-Term Rating ACUITE BB- | Reaffirmed |Issuer not co-operating* and Short-Term Rating ACUITE A4+ | Reaffirmed |Issuer not co-operating* as per report of Acuite Rating & Research dated August 11, 2023.

Acuite has reaffirmed the long-term rating of 'ACUITE BB-' (read as ACUITE double B minus) and the short-term rating of 'ACUITE A4+' (read as ACUITE A four plus) on the Rs. 14.70 crore bank facilities of Mahendra Realtors and Infrastructure Private Limited (MRIPL). The rating continues to be flagged as "Issuer Not-Cooperating" and is based on the best available information as per report dated August 11, 2023 and Acuite has downgraded the long-term rating to 'ACUITE B+' (read as ACUITE B plus) from 'ACUITE BB-' (read as ACUITE double B minus) and the short-term rating to 'ACUITE A4' (read as ACUITE A four) from 'ACUITE A4+' (read as ACUITE A four plus) on the Rs. 14.70 crore bank facilities of Mahendra Realtors and Infrastructure Private Limited (MRIPL) on account of information risk. The rating continues to be flagged as "Issuer Not-Cooperating" and is based on the best available information as per report dated November 08, 2024.

A lower credit rating exposes a company to significant financial, operational, strategic, and reputational risks. Financially, the company may face higher borrowing costs, stricter loan terms, and limited access to credit, making it difficult to secure funding for expansion or daily operations. Lenders may impose higher interest rates, require more collateral, or restrict repayment periods, leading to liquidity issues that can delay payments to employees, vendors, and creditors. Additionally, investor confidence may decline, reducing the company's ability to raise capital through equity or debt markets. Operationally, suppliers may impose stricter credit terms or demand advance payments, disrupting supply chains and increasing costs. Limited financing can also hinder business growth, acquisitions, and market expansion, while large customers may hesitate to enter long-term contracts due to concerns over financial stability. Strategically, a poor credit rating can put the company at a competitive disadvantage, as stronger competitors with better financing can invest more in innovation and market growth. Continued financial struggles may also attract regulatory scrutiny, adding pressure to maintain compliance with financial laws. Reputationally, a lower credit rating can create negative market perception, affecting relationships with stakeholders, suppliers, and customers. Publicly traded companies may experience stock price volatility as investor confidence weakens, and hiring top talent may become more difficult if employees perceive the company as financially unstable.

The company has discontinued the rating service since 2018 and bank has issued NOC for non-requirement of credit rating. We have never requested the said rating agency "Acuite Rating & Research" to rate us since 2018 and hence the rating given by Acuite Rating & Research is suo-moto.

36. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the 'Objects of the Issue'. Any shortfall in raising/meeting the same could adversely affect our growth plans, operations and financial performance.

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled "Objects of the Issue" beginning on page no. 99 of this Prospectus.

37. The proposed objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

The objects of the Issue for which the funds are being raised have not been appraised by any bank or financial institution. In the absence of such independent appraisal, the requirement of funds raised through this Issue, as specified in the section titled “*Objects of the Issue*” is based on the company’s estimates and internal research. We may have to revise our estimates from time to time and consequently our funding requirements may also change. This may result in the rescheduling of our expenditure plans and an increase or decrease in our proposed expenditure for a particular object. Deployment of these funds is at the discretion of the management and the Board of Directors of the company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

38. Our results of operations are likely to vary from year to year and be unpredictable, which could cause the market price of the Equity Shares to be volatile.

Our results of operations in any given year can be influenced by a number of factors, many of which are outside of our control and may be difficult to predict, including:

1. Business being manpower intensive and dependent on the supply and availability of a sufficient pool of contract labourers.
2. Liquidity Damage or termination of contracts by the clients on account of default on our part to meet the target
3. Reliance on sub-contractors and third parties for supply of raw materials and non-core Assets in construction.
4. Projects awarded from certain clients contribute to a significant portion of the Order Book.
5. Inability to realise the amounts reflected in the Order Book.
6. Operation of our clients in a highly regulated environment, and existing and new laws, regulations and government policies affecting the sector in which they operate.
7. Requirement to obtain approvals for our operations.
8. Availability of funds with Clients like PWD, MCGM etc. for making the payment of the work done.

Also, please refer to “*Management's Discussion and Analysis of Financial Condition and Results of Operations*” on page no. 264 for details on the factors affecting our financial results. All of these factors, in combination or alone could negatively impact our revenues and may cause significant fluctuations in our results of operations. This variability and unpredictability could materially and adversely affect our results of operations and financial condition.

39. We cannot assure that the construction/ repairs of our projects will be free from any or all defects, which may adversely affect our business, financial condition, results of operations and prospects.

In the course of our operations, we may encounter construction/repairs faults on account of factors including design-related deficiencies/process deficiencies / material quality deficiencies arising in our projects. Such faults typically result in revision/modification to the already executed work, thereby resulting in increased interest cost due to delay, increase in the estimated cost of operations on account of additional work executed towards Construction/ Repairs/ Rehabilitation and further expenditure incurred towards the appointment of external expert labours for redoing the work. We may further face delays in the estimated project completion schedule in respect of such projects on account of additional works required to be undertaken towards rectifying such construction faults and are dependent upon our clients’ permitting extension of time for completion of such projects. We cannot assure that the construction/ Repairs of our projects will be free from any and all defects. If the work undertaken by us is not to the satisfaction of the client, it has to be done again as per the instructions of the person in charge at the site without any extra cost. Further, there can be no assurance that any cost escalation or additional liabilities would be fully offset by amounts due to us pursuant to the guarantees and indemnities, if any, provided by our contractors or insurance policies that we maintain. Further, we also cannot assure you as to whether our clients will permit such a revised completion schedule to be implemented to the extent necessary or at all and we may be held in breach of the terms and conditions of the contracts in respect of such projects pertaining to completion schedule.

40. The directors of our company don't have the experience of the listed company and the requirements of being a listed company may strain our resources.

The Directors of the company don't have the experience of the listed Company; however, our Promoters cum Managing Directors and Whole-time director namely Mr. Hemanshu Shah and Mr. Bhavesh Mahendrakumar Shah have the experience of the Construction Industry. We have not been subjected to the increased scrutiny of our affairs by shareholders, regulator and the public at large that is associated with being a listed company. We will be subject to the equity listing agreement with the Stock Exchange which will require us to file audited annual and half yearly reports with respect to our business and financial condition.

Further, as a listed company, Directors and the Company will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and improve the effectiveness of our disclosure controls, procedures and internal control over financial reporting, significant resources and management attention will be required.

As a result, our management's attention may be diverted from business concerns, which may adversely affect our business, prospects, financial condition, and results of operations. Further, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge but cannot assure that we will be able to do so in a timely and efficient manner.

41. Our company has decided to give remuneration to Mr. Hemanshu Shah (Managing Director) and Mr. Bhavesh M. Shah (Whole Time Director) more than the net profit of the company.

Our company had reappointed Mr. Hemanshu M. Shah as Managing Director and changed the designation of Mr. Bhavesh M. Shah from Managing Director to Whole Time Director of the company in the meeting of the Board of the Directors held on December 9, 2024 and later the shareholders of the company had approved the reappointment and change in designation in the Extraordinary General Meeting held on the January 1, 2025 together with the following remuneration:

1. Mr. Hemanshu M. Shah

HRA	10,00,000	1,20,00,000
Bonus	1,66,600	19,99,200
Other Allowance	18,33,400	2,20,00,800
Total	56,00,000	6,72,00,000

2. Mr. Bhavesh M. Shah

Particulars	Remuneration (Per Month) (in Rs.)	Remuneration (Per Annum) (in Rs.)
Basic Salary	20,00,000	2,40,00,000
Employer's Provident Fund	6,00,000	72,00,000
HRA	10,00,000	1,20,00,000
Bonus	1,66,600	19,99,200
Other Allowance	18,33,400	2,20,00,800
Total	56,00,000	6,72,00,000

Note: Abovementioned remunerations are maximum remuneration to be paid.

High remuneration can strain the company's liquidity, especially if cash flow is tight, potentially limiting funds available for critical business operations, investments, or debt servicing. This can weaken the company's overall

financial stability and lead to a reliance on external borrowing, increasing financial leverage and interest obligations. Excessive remuneration could also reduce retained earnings and reserves, leaving the company less prepared to handle unexpected challenges or capitalize on growth opportunities.

42. *We have issued equity shares pursuant to a bonus issue prior to the Issue, and we will be eligible to issue equity shares pursuant to a bonus issue only when we have sufficient reserves.*

On March 26, 2024, our Company allotted an aggregate of 1,61,36,250 equity shares pursuant to a bonus issue in the ratio of 13 equity shares for every 1 equity share to our then existing equity shareholders. In terms of applicable law, bonus issue shall be made only out of free reserves, securities premium account or capital redemption reserve account and built out of the genuine profits or securities premium collected in cash. As on the date of this Prospectus, our Company's securities premium account was ₹ 115.2 Lakhs, and the available free reserves aggregated ₹ 4316.95 Lakhs. Additionally, we do not have capital redemption reserve account. Therefore, our Company will be eligible to issue bonus shares only when we have sufficient monies in our free reserves and our securities premium account.

43. *We appoint contract labour for carrying out certain of our operations and are subject to various labour legislations and regulations governing welfare, benefits and training of labours that we engage. We may be held responsible for paying the wages of such workers, if the independent contractors through whom such workers are hired default on their obligations, and such obligations could have an adverse effect on our results of operations and financial condition.*

We are subject to laws and regulations relating to employee welfare and benefits such as minimum wage and maximum working hours, overtime, working conditions, non-discrimination, hiring and termination of employees, employee compensation, inter-state migrant registrations, employee insurance, bonus, gratuity, provident fund, pension, superannuation, leave benefits and other such employee benefits. In the event the welfare requirements under labour regulations applicable to us are changed, which leads to an increase in employee benefits payable by us, there can be no assurance that we will be able to maintain our profit margins. Our Company appoints sub-contractors for engagement of on-site contract labour for performance of certain of operations. We may be held responsible for any wage payments to be made to such labourers in the event of default by such sub-contractors. Any requirement to fund their wage requirements may have an adverse impact on our results of operations and financial condition. Further any order from a regulatory body or court ordering us to absorb such contractual labourers as permanent employees on our rolls, may have an adverse effect on our business, results of operations and financial condition. In past three financial year no such incident has been occurred.

44. *Our Company has experienced delays in paying statutory dues, which could result in penalties by the concerned authorities.*

Our Company has experienced delays in the payment of certain statutory dues to various authorities in the past. These delays were primarily due to lapses in our internal controls and processes. While we have taken steps to strengthen our financial management systems and internal controls to ensure timely payments going forward, there can be no assurance that such delays will not occur in the future. Any recurrence of such delays could subject us to penalties, interest, and other legal proceedings, which may adversely affect our financial condition and results of operations.

45. If we are not able to obtain, renew or maintain our statutory and regulatory licenses, registrations and approvals required to operate our business, it may have a material adverse effect on our business, results of operations and financial condition.

We require certain statutory and regulatory licenses, registrations and approvals to operate our business, some of which are granted for a fixed period of time and need to be renewed from time to time. Further, in future, we may also be required to obtain new licenses, registrations and approvals for any proposed operations, including any expansion of existing operations. There can be no assurance that the relevant authorities will renew such licenses, registrations and approvals in a timely manner or at all. Further, these licenses, registrations and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. We may be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details on the licenses obtained by our Company and licenses for which renewal

applications have been made, kindly refer the chapter titled “*Government and Other Approvals*” beginning on page no. 288 of this Prospectus.

46. Our Company has availed certain unsecured loans which may be recalled at any time.

Our Company has availed certain unsecured loans for temporary funding, which may be recalled at any time. In the event, any of such unsecured lenders seek a repayment of any these loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to undertake new projects or complete our ongoing projects. Therefore, any such demand may adversely affect our business, financial condition and results of operations. For further details, see “*Financial Indebtedness*” on page no. 261 of this Prospectus.

47. Our clients operate in a highly regulated environment, and existing and new laws, regulations and government policies affecting the sector in which they operate could adversely affect our business, financial condition and results of operations. Any failure to obtain licenses and approvals by our clients, could adversely affect our business, financial condition and results of operations.

The construction industry in India is subject to extensive regulation by central, state, and local governmental authorities. Compliance with these complex and ever-evolving regulations increases operational costs and imposes additional compliance requirements, which could adversely affect the financial condition, business operations, and growth prospects of infrastructure companies.

Changes in the regulatory framework, including modifications to government policies, laws, and regulations, may create challenges for infrastructure development and operations. The timing, scope, and content of any new laws or regulations are beyond the control of the company, and such changes may have an adverse impact on business performance, financial stability, and the ability to execute projects efficiently.

Particularly, any additional approvals or compliance requirements imposed on our clients may result in delays in obtaining necessary clearances or permits for infrastructure projects. These delays could hinder the commencement or completion of projects on schedule, impacting the overall timeline and financial outcomes of the work. Such regulatory challenges may also create operational inefficiencies and disrupt relationships with clients, further affecting the long-term viability and success of projects.

48. We are subject to strict quality requirements and any failure on our part to comply with quality standards may lead to cancellation of orders.

We may not be able to meet strict quality standards imposed by our clients, applicable to the construction processes, for a variety of reasons, including deficiency in the quality of raw materials delivered to us or errors in the designs provided by the client, which could have an adverse effect on our business, financial condition, and results of operations. We cannot assure you that we comply or can continue to comply with all the required quality standards of our clients. Our failure to achieve or maintain compliance with these requirements or quality standards may subject us to loss of business, warning letters, fines or penalties, which could harm our business. Further, failure to comply with quality requirements, could lead to cancellation of contracts which may have a material adverse effect on our business and revenue. However, no such instance happened in the history of the Company.

49. Industry-related data is taken from online sources and therefore may be incorrect or inaccurate.

Industry and related data contained in this Prospectus may be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete,

inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

50. If we fail to maintain an effective system of internal controls, we may not be able to successfully manage, or accurately report, our financial risks.

Effective internal controls are necessary for us to prepare reliable financial reports and effectively avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may deteriorate over time, due to evolving business conditions. There can be no assurance that deficiencies in our internal controls will not arise in the future, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls. Any inability on our part to adequately detect, rectify or mitigate any such deficiencies in our internal controls may adversely impact our ability to accurately report, or successfully manage, our financial risks, and to avoid fraud.

51. We will not receive any proceeds from the Offer for Sale. The Selling Shareholder will receive the entire proceeds from the Offer for Sale.

The Offer includes a Fresh Issue and an Offer for Sale of Equity Shares by the Selling Shareholder. While our Company will receive the entire proceeds from the Fresh Issue, the entire proceeds from the Offer for Sale will only be paid to the Selling Shareholder and we will not receive any such proceeds. For further details, see “The Issue” and “Objects of the Issue” on page no’s 61 and 99 of this Prospectus.

52. Our Promoter and Promoter Group will continue to retain substantial shareholding in us after the Issue, which will allow them to exercise significant influence over us.

After the completion of the Issue, our Promoters and members of the Promoter Group will hold approximately 73.68% of our Company’s outstanding equity share capital. Accordingly, our Promoters and Promoter Group will continue to exercise significant influence over our business and all matters requiring shareholders' approval, including the composition of our Board of Directors, the adoption of amendments to our Memorandum and Articles of Association. This concentration of ownership may also delay, defer or even prevent a change in control of our Company and may make some transactions more difficult or impossible without the support of our Promoters and Promoter Group. Further, the Takeover Regulations may limit the ability of a third party to acquire control. The interests of our Promoters, as our Company's controlling shareholder, could conflict with our Company's interests, your interests or the interests of our other shareholders. There is no assurance that our Promoters will act to resolve any conflicts of interest in our Company's or your favour.

53. We operate in a competitive business environment and our inability to compete effectively may adversely affect our business, results of operations, financial condition and cash flows.

The industries in which we operate are competitive with both organized and unorganized markets. We may be unable to compete with the prices and services offered by our competitors. We may have to compete with new players who enter the market and are able to offer competing services. Our competitors may have access to greater financial, research and development, marketing, distribution and other resources and more experience in obtaining the relevant regulatory approvals. Increasing competition may result in pricing pressures and decreasing profit margins or loss of market share or failure to improve our market position, any of which could substantially harm our business and results of operations. We cannot assure you that we will be able to compete with our existing as well as future competitors as well as the prices and payment terms of our services. Our failure to successfully face existing and future competitors may have an adverse impact on our business, growth and development.

54. We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.

Our Company seeks to grow its market reach domestically to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges in addition to the advancement of research and development in the construction industry, changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our services. Further, clients may be price conscious and we may be unable to compete effectively with the services of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

55. Our Promoters, Directors, and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.

Our Promoters, Directors, and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Director, and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details please refer to the paragraphs titled — “Interest of our Directors” in the chapter titled — “Our Management”, the paragraphs titled — “Interest of our Promoters and Other Interests and Disclosures” in the chapter titled — “Our Promoters and Promoter Group”, “Financial Indebtedness” and “Restated Financial Information” on page no’s 195, 212, 217, 261 and 227 respectively of this Prospectus.

There can be no assurance that our Promoters, Directors, and Key Managerial Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

56. The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Issue Price.

Our Promoters' average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price which is proposed to be determined on a book building basis. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled “Capital Structure” on page no. 82 of this Prospectus.

57. Our future fund requirements, in the form of further Issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any further Issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

58. In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/or additional indebtedness.

In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favourable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled — “*Financial Indebtedness*” on page no. 261 of this Prospectus.

59. Our success largely depends upon the knowledge and experience of our Promoters, Directors and our Key Managerial Personnel. Loss of any of our director’s and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.

The growth and success of our Company’s future significantly depends upon the experience of our Promoters and continued services and the management skills of our Key Managerial Personnel and the guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable for the operations of our Company. Our future success and growth depend largely on our ability to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel in the past, however, any attrition of our experienced Key Managerial Personnel, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our highly skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — “*Our Management*” on page no. 195 of this Prospectus.

60. Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.

Our operations are subject to inherent risks and dangers which may adversely impact our profitability. Presently, we maintain certain insurance policies. There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or adequately insured, which in turn may expose us to certain risks and liabilities. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it could adversely affect our results of operations and financial position. Most insurance policies do not cover natural damages, and claims are often subject to a minimum loss threshold for acceptance. For more details, please refer the Insurance in the chapter titled “*Our Business*” on the page no. 144. In past three financial year no such incident of insurance claim has been occurred except mentioned below.

(Amt in Lakhs)

61. Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past, and there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled “Dividend Policy” on page no.226 of this Prospectus.

62. The data and statistics added in this Prospectus may be incomplete or inaccurate or may not be comparable to statistics produced elsewhere.

We have not independently verified data from the industry and related data contained in this Prospectus. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

63. The requirements of being a listed company may strain our resources.

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI (LODR) Regulations which will require us to file audited annual and unaudited half yearly results and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. we cannot assure you that we will be able to do so in a timely manner.

64. The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.

Prior to the Issue, there has been no public market for the Equity Shares, and an active construction market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

The Issue Price of the Equity Shares is proposed to be determined through a book building process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. Investors may not be able to resell your Equity Shares at a price that is attractive to you.

65. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of National Stock Exchange of India Limited in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of the National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

66. Investors will not be able to sell immediately on the Stock Exchanges any of the Equity Shares you purchase in the Issue.

The Equity Shares will be listed on the Emerge Platform of the National Stock Exchange of India Limited. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Upon receipt of final approval from the Stock Exchanges, trading in the Equity Shares is to commence within three (3) working days of the date of closure of the Issue or such other time as may be prescribed by SEBI.

We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time period prescribed by law. Further, there can be no assurance that the Equity Shares to be Allotted pursuant to this Issue will be listed on the Stock Exchanges in a timely manner or at all.

67. There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The

Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

68. Delay in raising funds from the IPO could adversely impact the implementation schedule.

The proposed expansion, as detailed in the section titled "Objects of the Issue" is to be mainly funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the expansion process within the given timeframe, or within the costs as originally estimated by us. Any time overrun, or cost overrun may adversely affect our growth plans and profitability.

69. Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through further issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

70. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

71. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax ("GST") regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the amendment of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2025 and the Ministry of Finance has notified the Finance Act, 2025 ("**Finance Act**"). There is no certainty on the impact that the Finance Act may

have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

72. Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

73. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

74. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance of our business. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence and spending. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

75. Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%

2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

Revenue: The Company projects its revenue from operations to increase from ₹12,477.18 Lakhs in FY 2024-25 to ₹18,471.14 Lakhs in FY 2025-26.

Working Capital: As of FY 2022-23, the working capital requirement stood at ₹ 2,327.88 Lakhs on a restated basis which decreased to ₹1,090.55 Lakhs in FY 2023-24. The same is increased to ₹ 2,987.74 Lakhs in FY 2024-25 and estimated to be ₹ 4,818.72 Lakhs in FY 2025-26 and further to ₹ 6,347.64 Lakhs in FY 2026-27 based on the business projections. These estimates are based on anticipated orders and strategic business growth.

The Company's working capital needs have expanded in alignment with revenue growth, primarily driven by its effective participation in tender processes. The Company is focused on reducing trade payable days compared to the previous year, which will facilitate the procurement of materials at discounted rates and thus, decreasing our cost.

The Company requires the working capital for the execution of the project, in the form of fund-based limit (Secured Over Draft) and non-fund-based limit (Bank Guarantee). With the increasing no. of projects, increased working capital is required for smooth functioning. Majorly, the Company requires non-fund base limit as the Company needs to provide bank guarantee (performance bank guarantee) after winning the respective bided project.

As market is tendering towards aggressive bidding style, Company has to bid below estimated cost of the project to secure the bid. This requires additional security deposit to make sure that the Company fulfils the contract as per the stated terms only and need to be paid on fund base.

Working capital requirement has increased because of increase in the outstanding order book of the Company. As on 30th June, 2025 the Company has outstanding order book of ₹18,069.11 lakhs in hand.

Basis of Estimation

The Company is primarily into the business of government contracting such as civil structure repairs and restoration, plumbing contracting, offering specialised services in civil engineering, structural repairs, waterproofing, painting, interior work, and plumbing. Due to the nature of this business, it is highly working capital intensive. A significant portion of the working capital requirements is financed through internal accruals.

The Company's estimated working capital requirements are based on the following key assumptions:

Sr. No	Particulars	Details
1.	Trade Receivables	<p>The Company is in a business where payment realization from clients is delayed due to administrative clearances of government departments, after which the accounts department makes a demand for payment and then the payment is released, so the Trade Receivables period in this business typically ranges between 45 and 70 days depending on project to project. In FY 2022-23 it stands at 76 days, due to lower revenue from operations by ₹2,964.43 Lakhs as compared to FY 2021-22. Also, due to pending litigation of trade receivable of ₹440.85 lakhs, which increases the receivable days in FY 2022-23.</p> <p>From FY 2021-22 to FY 2023-24, the trade receivables holding period decreased from 61 days to 49 days with an exception of 76 days in FY 2022-23 due to the reason as mentioned above The Company's clients' favourable credit terms have contributed to this positive trend</p> <p>Looking ahead, the Company expects trade receivable days to be comparable to previous years. The Company estimates Trade Receivable days of 58 days in FY 2025-26 and FY 2026 - 27, The payment of the bill is subject to availability of fund from government and hence working capital requirement can go up with an increase in the estimated size of operations of the Company. The Company as on 30th June, 2025 has orders of ₹18,069.11 lakhs in hand.</p> <p>The company expects a significant increase in trade receivables in FY27, driven by both industry trends and its own expansion strategy. Within the infrastructure sector, the average trade receivable period typically ranges from 45 to 70 days. Aligning with this, the company has estimated its receivable cycle at around 58 days. As revenue grows from the execution of its ₹18,069.11lakhs order book, the absolute value of trade receivables is naturally expected to rise, even if the receivable period remains consistent. Additionally, a major portion of the company's work is government-related, and recent trends indicate a slowdown in government payments due to budgetary constraints and fund shortages. These delays are expected to result in higher receivable balances and increased pressure on the company's cash flow during the period.</p> <p>In summary, the projected increase in trade receivables in FY27 is a direct consequence of rising operational scale, government payment delays, and the nature of large, long-term contracts. This scenario underscores the need for robust working capital planning to support the company's growth momentum.</p>

2.	Trade Payables	<p>Trade payable is an amount to be paid by the Company to its suppliers following the purchase of materials & components, stock-in-trade and other expenses on credit.</p> <p>From FY 2021-22 to FY 2022-23, the trade payables holding period increased from 17 days to 33 days. In FY 2023-24 it was 77 days as Company repaid their borrowings of ₹2,738.48 lakhs to decrease its finance cost and increase its profitability, due to which it had low cash outstanding in March 2024. Company paid its creditors in next FY bringing back the payable days back in line.</p> <p>The Company estimates Trade Payable Holding period of 25 days in FY 2025-26 and FY 2026-27. Company expects better pricing and continuous supply from vendors by making early payment and negotiate better deals. With improved cash flow, The Company can settle its trade payables more promptly, further reducing the holding period which will provide better pricing from vendors and negotiate better deals.</p> <p>The substantial rise in trade payables to ₹1,518.80 lakhs in FY 2023–24 (14.96% of revenue and 77 payable days) is primarily attributed to strategic cash flow management amid the company’s efforts to reduce its finance costs. During the year, the company opted to repay short-term borrowings amounting to ₹2,738.48 lakhs, significantly bringing down its finance cost from ₹259.56 lakhs in FY 2022–23 to ₹125.25 lakhs in FY 2023–24. While this repayment improved the company’s leverage position and long-term financial health, it also led to lower cash availability by the end of March 2024. As a result, payments to suppliers and creditors were temporarily deferred, pushing trade payables higher as of the balance sheet date. This increase was a timing difference and not a result of operational inefficiency. Additional strain on working capital arose from non-recovery of trade receivables, which contributed further to the higher trade payable balance in FY 2024-25. The temporary rise in trade payables in FY 2023–24 was driven by strategic debt repayment and subsequent cash flow management decisions, compounded by delays in trade receivable recovery in FY 2024–25. These measures have strengthened the company's long-term financial health. The normalization expected in FY 2025–26 confirms that the surge was not due to a structural issue, but rather a short-term timing difference to balance liquidity after significant financial restructuring.</p>
3.	Inventory Days	<p>Inventory includes raw materials such as cement, pipes, chemicals, tiles etc., and work in progress projects for which revenue recognition is pending.</p> <p>In FY 2024-25 it had high inventory days due to high work in progress pending for revenue booking of BOT project.</p>

		<p>From FY 2022-23 to FY 2024-25, the inventory holding period has witnessed an increase from 13 days to 27 days. This increase in inventory holding period can be attributed to an increase in work in progress projects for which revenue recognition is pending.</p> <p>In FY 2025-26 to FY 2026-27 it estimated 11 inventory days which is in line with previous trend.</p>
4.	Deposits held under lien (further explained below as ASD/EMD/PSD)	<p>Deposits hold under lien includes Margin money deposits with</p> <p>i) more than 12 months maturity and</p> <p>ii) more than 3 months and less than 12 months maturity.</p> <p>As part of the Company's business and as is customary, the Company's clients deduct margins from each invoice as retention money and the Company is required to provide performance bank guarantees in favour of the project clients under the respective contracts.</p> <p>With increase in the quantum of projects, the Company will require higher margins as deposits for Bank Guarantees. For Higher Bank Guarantee limits, the Company is required to maintain a healthy balance with banks in the form of Fixed Deposits.</p>
5.	Cash and Cash Equivalents and Bank Balances	<p>Cash and cash equivalents includes cash in hand and balance in current accounts along with Fixed deposit of less than 3 months Bank Balances includes Fixed Deposits with more than 3 months and less than 12 months. The working capital requirement of the Company arises from the need to keep bank balances in the form of fixed deposits towards issuance of bank guarantees.</p>
7.	Other Current Assets	<p>Other Current Assets include Security Deposits, interest accrued on fixed deposits and others, Earnest money deposit and other receivables which is less than 12 months It increases as the revenue from operations is increased as Company participates in more bidding with the availability of funds and thus increases its chances of securing more contracts.</p>
8.	Short-Term Loans and Advances	<p>It includes advance given to suppliers and staff imprest, so to operate work without any disruptions.</p> <p>This reflects the time needed for the realization of advances and loans provided for business purposes. Given the nature of business expansion and the financial needs involved.</p>
9.	Short-Term Provisions	<p>It includes provisions with respect to employee benefits, expenses payable and provision of tax.</p>
10.	Short term Borrowings	<p>Short term borrowings majorly include current bank overdraft with Union Bank with the sanction limit of ₹2,842 lakhs. It has been estimated that the Company will utilize its limit up to ₹2000 lakhs during all the projected year.</p>

11.	Net Working Capital days	The company's working capital days improved from 135 days in 2023 to a projected 90 days in 2027. By 2026-2027, working capital days are expected to stabilise (50-90 days), supporting better cash flow, higher profit margins, and stronger market positioning.
-----	--------------------------	---

Reason for percentage change of Net Working capital in terms of Revenue from operations:

From FY 2022-23 to FY 2023-24:

Outstanding Trade Payables: As company repaid its short-term borrowings of ₹2,738.48 lakhs in FY 2023-24, leading to lower cash and cash equivalents available with the company. This led to delayed in payment to creditors showing higher balance at the end of the year. Due to this Trade receivables with respect to revenue from operations was increased from 6.41% in FY 2022-23 to 14.96% in FY 2023-24.

Favourable Credit Terms: The Company is in a business where payment realisation from debtors is delayed due to administrative clearances from government departments. These clearances vary on project-to-project basis. Due to slight favourable terms and projects in FY 2023-24, it led to early payments by debtors leading to debtor turnover of 49 days.

Working capital in FY 2024-25, 2025-26 and 2026-27

The company's revenue outlook appears strong, backed by a substantial order book of ₹18,069.11 lakhs as on 30 June 2025, which reflects healthy demand visibility and execution potential over the coming periods. This order pipeline not only demonstrates customer confidence but also indicates the company's strengthened market position and business continuity post the earlier political and administrative disruptions.

Key Supporting Factors:

1. Robust Order Book Position:

- An order book of ₹18,069.11 lakhs positions the company to recognize significantly higher revenues over the next few years, subject to timely execution.
- This represents a solid base for revenue conversion, particularly in the company's core segments of structural repair, interior works, and civil maintenance.

2. Improved Working Capital Efficiency:

- The company is optimizing its receivables of revenue from operations, indicating a sharper collection cycle and better credit control practices.
- **Payables are maintained** of revenue, aligning well with industry norms and ensuring stable supplier relationships.
- **Inventory levels are managed efficiently** suggesting lean operations with minimal stockholding costs.

Conclusion:

With receivables, payables, and inventory ratios considered, the net **working capital requirement falls in line with** revenue from operations. This is a sustainable level, indicating the company is well-positioned to fund its operational needs without over-reliance on external borrowings, improving overall liquidity and operational scalability.

The Company's primary working capital requirements arise from its active participation in tendering processes, which require various financial commitments, including Earnest Money Deposits (EMD) before bidding, Initial Security Deposits (ISD), Additional Security Deposits (ASD) or Performance Security Deposits (PSD) before execution, and retention amounts being held during the Defects Liability Period (DLP) by the customer at each stage of project when invoice is raised to customer. Retention money is released after the completion of project. In addition to these obligations, the Company incurs regular monthly expenditures, including material procurement, employee salaries, rent, insurance, freight, and other operational costs. A substantial portion of

the Company's working capital is tied up with sundry debtors in the form of EMD, ASD and retention amounts, driven by its for effectively participation in more tender participation strategy to fuel revenue growth.

The significance of each of the above pre-deposits, retentions, etc and how they affect the working capital requirement is provided in the below part:

- 1. Earnest Money Deposit (EMD):** Earnest Money Deposit is a refundable deposit submitted while participating in tenders or bids as a token of commitment to the bidding process. This deposit is required by customers to ensure that only serious bidders participate in the tender. From the inflow of funds, the Company will be able to bid for more contracts, due to availability of funds.
- 2. Performance Security Deposit (PSD):** The Performance Security Deposit is generally against bank guarantee as security for the work done. It is given by Company, post securing of tender and remains locked for the duration of the project.
- 3. Additional Security Deposit (ASD):** Additional Security Deposit is submitted at the time of filing of tender and remains locked for the duration of the project or 90-182 days from the bid opening date if the tender is not received. The need for this additional security further increases the working capital requirement, as it ties up financial resources. As on 31th March, 2025 ₹369.51 lakhs had been deposited as ASD as non-current asset and ₹92.91 lakhs as current asset.

Refer the below table for the more clarification on actual projects currently in the market for bidding:

(Amount in Rs. Lakhs)

Department	Name of Work	Estimated Cost (₹)	Earn est Money Deposit (₹)	Bid Validity (Days)	If Co. Quote	ASD Clause	Additional Security Deposit (₹)	ASD Refund Date	% of Working Capital Requirement
Department 1	Restoration, Upgradation, Addition & Alteration of Bombay Veterinary College, Parel, Mumbai	3,020.71	15.11	120	25% Below	If the bidder quotes their offer below by more than 15% of the estimated cost, they must submit an ASD of 2% for every additional percentage beyond 15%, in addition to 1% + 5% as mentioned in Clauses 1.10.2 and 1.10.3. Example: For a 19% quote, ASD = (19%-15%) × 2% + 1% + 5% = 14%	785.38	15 Months	26.50%

Department	Name of Work	Estimated Cost (₹)	Earnest Money Deposit (₹)	Bid Validity (Days)	If Co. Quote	ASD Clause	Additional Security Deposit (₹)	ASD Refund Date	% of Working Capital Requirement

Up to 12% rebate: No ASD. 2. 12.01%–20% rebate: 1% of estimated cost per percentage and part thereof above 12%. 3. Department 3	Structural repairs to various elements of various constructed structures in Central Park, Sector – 23 at Kharghar, Navi Mumbai.	688.11	6.89	120	25% Below	In case the L1 Bidder quotes an offer which is lower than 85% of the Biddable Part of cost put to the Bid (unbalance on the lower side) then the Bid shall be considered as an unbalanced Bid.	68.81	14 Months	11.00%

Note: Project examples is as per actual tender floating as on the date and quotation provided has been given on estimated basis, to explain the concept of ASD and PSD and how tendering works.

Key Observations:

a. Earnest Money Deposits (EMD):

Varies significantly across projects, proportional to the estimated cost.

b. Bid Validity Period:

Department 1 and Department 2 have shorter bid validity of 120 days, while Department 3 requires a longer commitment of 180 days.

c. ASD Clauses:

Department 2 imposes a steep ASD for effective bidding, progressively increasing financial obligations. Department 3 has a tiered ASD structure based on the rebate percentage. Department 1 introduced an additional security requirement for unbalanced bids (below 85% of the estimated cost).

d. Working Capital Impact:

Department 2 project ties up the highest percentage of working capital (26.50%). Department 3 and Department 1 demand 19% and 11%, respectively, indicating varied financial strain depending on the project.

e. Justification:

Department 1	The high percentage of working capital required is due to the Additional Security Deposit (ASD) clause. As per the terms, an ASD of up to 14% of the estimated cost must be maintained for bids with quotes more than 15% below the estimated cost. This ties up a significant portion of the Company's liquidity over a period of 15 months. Furthermore, retention amounts during the project execution and delays in payment release contribute to the need for additional capital.
Department 2	The percentage of working capital required is substantial due to the stepped ASD structure, which requires increasing contributions as the bid rebate increases. For a 25% rebate, this results in a total ASD of approximately ₹2.41 Cr, which remains locked for 15 months. This financial commitment is compounded by retention money held during project execution, impacting cash flow.
Department 3	A lower percentage of working capital is required as the ASD clause is applicable only for bids classified as "unbalanced." However, the Company's 25% below quote triggers an ASD requirement of ₹68.81 Lakhs. The overall working capital need is lower compared to other projects due to the smaller contract size and a more flexible payment structure

Example for EMD & ASD:

Tender Bid Amount (Estimated Cost): ₹10,000,000

Rebate Offered: 25%

Calculation

Rebate Range: The rebate is above 20%, so we need to calculate ASD for two parts: 12% to 20%:

For the first 8% (from 12.01% to 20%):

ASD = 1% of estimated cost for each percentage above 12%.

Calculation: $8 \times 1\% \text{ of } ₹10,000,000 = 8\% \text{ of } ₹10,000,000 = ₹800,000$

For the additional 5% (from 20% to 25%):

ASD = 1% of estimated cost for each percentage over 20% plus an extra 2%.

Calculation: $5 \times (1\% + 1\%) = 5 \times 2\% = 10\% \text{ of } ₹10,000,000 = ₹1,000,000$.

So, Total ASD = ₹800,000 + ₹1,000,000 = ₹1,800,000

Summary

For bidding ₹10,000,000 with a 25% rebate, the total Additional Security Deposit required would be ₹1,800,000 due to the effective tendering strategy. This highlights how higher rebates lead to increased financial commitments, which can significantly impact working capital.

4. Retention Amount: The retention amount is the amount which is withheld by customers as part of contractual obligations. To ensure smooth operations and timely execution of projects, additional working capital is required to bridge the gap created by the withheld amount. This enables the Company to meet its ongoing operations and fulfil operational requirements without disruption.

To understand the calculation of Retention amount and its impact, the following tables shows the contracts awarded to the Company with respective terms & conditions:

(Amount in Rs. Lakhs)

Department	Name of Work	Estimated Cost (₹)	Performance Bank Guarantee (₹)	ISD (₹)	Retention Money (₹)	Contract Deposit / ASD Refund (₹)	% of Working Capital Requirement	Validity Remarks
Department 3	Structural Repairs of 14 Nos. of culverts in sectors 1 to 14 in Dronagiri Node	286.37	-	7.16	7.16	66.41	28.19%	ISD: 19 months, Retention Money: 31 months, Contract Deposit/ASD Refund: 19 months
Department 1	Structural Repairs and Renovation to Jari-Mari Police Residential Buildings (A-N) and New Police Line Buildings (1, 3-6) at Thane Taluka, Dist. Thane	4,018.18	-	80.37	80.37	-	4.00%	ISD: 13 months, Retention Money: 132 months
Department 2	Major Repairs and Rehabilitation of Sion ROB (Chunabhatti) in City Z-II	875.66	95.62	17.51	43.78	91.48	28.37%	Performance Bank Guarantee: 19 months, ISD: 19 months, Retention Money: 78 months, ASD Refund: 54 months

Justification for Working Capital Requirements

In addition to the factors outlined above, a substantial portion of the Company's working funds is locked in retention amounts, security deposits, and related project-specific financial commitments. Although these funds are recorded under non-current assets due to their prolonged realisation timelines, they are effectively tied to the working capital cycle, given their critical role in supporting ongoing projects.

Working Capital Cycle and Project Period

- The Company operates on a working capital cycle of 12 months on average. However, project durations typically range from **6 to 24 months**, depending on the complexity and size of the contract.
- Funds tied up in **retention, Initial Security Deposits (ISD), Additional Security Deposits (ASD), and Performance Bank Guarantees (PBG)** remain blocked for extended periods, often beyond a single financial year.

This structural characteristic of the operations of the Company creates a significant strain on liquidity, as funds directly linked to operational needs are classified as non-current assets due to their longer release cycles.

Funds Blocked in Non-Current Assets Related to Projects

The following table illustrates the year-on-year growth in funds tied up in project-related non-current assets: Year-on-Year Growth in Blocked Funds. Amount in lakhs

Particulars	Amount in Lakhs				
	Audited 31.03.2023	Audited 31.03.2024	Audited 31.03.2025	Projected 31.03.2026	Projected 31.03.2027
Non-current Assets Related to Projects*	₹3,663.97	₹5,487.84	₹ 6,091.48	₹10,783.60	₹13,613.61

*It includes ASD deposits, EMD paid, Security Deposits, fixed deposits with longer than 12 months maturity and other security Deposits.

Fixed Deposits is used as security for bank guarantee given to govt. authorities as performance security deposits and rest is utilised as security for secured over drafts limit. Hence, maintenance of is as important as any other deposits.

- FY 2022 to FY 2023:** A decrease in blocked funds due to the completion of several shorter-duration projects and release of retention amounts.
- FY 2023 to FY 2024:** An increase of ₹1,823.86, driven by new projects initiated, requiring higher retention and security deposits.
- FY 2024 to FY 2025:** An increase of ₹603.64, reflecting ongoing large-scale projects with extended retention and security requirements.
- FY 2025 to FY 2026 (Projected):** A substantial growth of ₹4,692.12, driven by project expansion and participation in high-value tenders.
- FY 2026 to FY 2027 (Projected):** Participation in high-value tenders and release of retention amounts leading to growth of ₹2,830.01

Impact on Working Capital

These amounts represent funds that are indispensable for project execution, encompassing various financial commitments integral to contract fulfilment. Retention amounts, withheld by clients during the project period, are typically released only upon completion and after the defect liability period, prolonging the tied-up capital. Initial Security Deposits (ISD), required at the start of projects, significantly impact liquidity by remaining locked for the duration of the work. Additional Security Deposits (ASD), often necessitated by effective/aggressive bidding terms, further elevate the financial burden. Performance Bank Guarantees (PBG),

essential for securing contractual obligations, frequently extend beyond project completion, further compounding the strain on available funds. These elements collectively emphasize the critical role of such commitments in ensuring seamless project execution while also highlighting their impact on working capital.

While classified as non-current assets, these funds are critical for project execution and align directly with the Company's operational needs. Their extended holding periods significantly affect the liquidity available for day-to-day operations, highlighting the necessity for robust working capital support.

Conclusion

The increasing scale and complexity of projects undertaken by the Company, coupled with the significant funds blocked in project-specific financial commitments, justify the growing working capital requirements.

The year-on-year growth in blocked funds illustrates the expanding scale of operations and the corresponding financial commitments required to sustain and execute larger, longer-duration projects efficiently. As the Company continues to participate in large tenders, the working capital needs will proportionally increase to meet project execution and financial obligations.

GLOBAL ECONOMY

- Global economic activity in 2024 has been moderate thus far. While higher borrowing costs and tight monetary conditions affected global growth, structural weaknesses are restraining growth in a few major European countries such as Germany, France, Italy, and China. On the other hand, the US economy continues to exhibit strong growth momentum driven by consumption.
- According to the latest global composite Purchasing Managers' Index (PMI), global economic expansion accelerated from September's eight-month low, driven by stronger business confidence and growth in new order intakes. The services sector, particularly financial services, led the expansion, while manufacturing activity remained stagnant. Service sector business activity increased for the twenty-first consecutive month in October. Manufacturing conditions remained lacklustre, although India, Spain, and Brazil topped the manufacturing PMI growth rankings

- A gradual shift from goods to services consumption is underway, underpinning stable global growth. This shift is boosting activity in the services sector in both advanced and emerging markets while slowing down manufacturing. Manufacturing production is increasingly shifting towards emerging market economies, as advanced economies experience a decline in competitiveness

- The International Monetary Fund (IMF), in its October 2024 World Economic Outlook (WEO), has retained a global growth projection of 3.2 per cent for both 2024 and 2025. While the global outlook remains stable, there are shifts in growth dynamics across various regions.
- Projections for advanced economies as a group show stability, with growth in the United States supported by stronger consumption resulting from robust increases in real wages and non-residential investment. However, growth projections have been downgraded for some European economies. Weaknesses in the manufacturing sector continue to constrain growth in countries like Germany and Italy. The Euro Area is projected to experience modest growth recovery in 2024 and 2025, driven by improvements in export performance and domestic demand. Japan's growth projection has been revised downwards, reflecting a temporary supply disruption in the car industry and the base effect of historical data revisions. Conversely, growth in the United Kingdom is expected to be supported by moderating inflation and interest rates, which will contribute positively to stimulating domestic demand

(*) Emerging Market and Developing Economies					

- Price pressures across economies have abated substantially after peaking towards the end of 2022, on account of central bank policy rate hikes and improved supply chain resilience. As inflation approaches the central bank target levels, disinflation seems to have slowed on account of sticky core inflation. This is due to persistence in services price inflation driven by higher nominal wage growth. There are early signs of wage growth moderating, which will aid disinflation. In contrast, core goods price inflation has declined significantly. While supply chains have adapted to ongoing geopolitical disturbances and led to a softening of commodity prices, excess manufacturing capacity exists in a few major economies. Going forward, inflation is expected to align with central bank targets. However, the IMF notes that fiscal consolidation across economies between 2022 and 2024 has not played out as planned, thereby contributing to inflationary pressures. Adverse weather events and their effects on food prices may also affect disinflation, particularly in EMEs.

- There is a broad consensus that after a successful disinflationary phase, monetary policy will have to be eased in order to avoid recession. Central banks have begun to implement a policy shift and reduced policy rates, and have signaled more to come. This is evident from movements in the Global Monetary Policy Tracker Index of the Council for Foreign Relations. The index tracking 54 countries has values between (-)10 and 10. A value of (-)10 indicates that all 54 countries have tightened monetary policy and vice versa. The index declined from (-)0.4 in January 2024 to (-)8.6 in October 2024 indicating that a majority of the countries under consideration have loosened monetary policy.

India Economy

- A few downside risks to global growth have surfaced, of late. Financial assets such as bond prices may be repriced if inflation proves stubborn, driven by global tensions and commodity prices. That can lead to tighter conditions and potential market instability. This may affect developing economies that are vulnerable to higher borrowing costs. Countries with high external financing and low reserves face a heightened risk of sovereign debt stress. Rising protectionism may also hamper growth. On the upside, stronger investment recovery in advanced economies, along with increased private sector investment, could boost growth prospects. Accelerated structural reforms, especially in labour participation and market efficiency, could also support medium-term growth.
- It is in this context; that the latest data reveals that India is quietly holding its ground. After a moderation in recent months, the October 2024 readings of high-frequency indicators of economic activity point towards

steady growth. Gross Goods and Services Tax collection rose by 9.4 per cent in April -October 2024 over the same period last year, reflecting continued momentum in the economic activity. India's headline manufacturing PMI saw a substantial increase in October, reflecting the continued improvement in the economy's operating conditions. Expanding new orders and international sales indicate robust demand growth for India's manufacturing sector. As evidenced by the latest services PMI data, Indian service providers sustained a strong rate of output expansion in October, continuing a sharp and accelerated growth trend that outpaced its long-run average. The services sector also witnessed significant increases in consumer demand and job creation in October.

- Domestic demand is holding steady. Data on fast-moving consumer goods sales for Q2 FY25 released by Nielsen IQ point towards improving urban and robust rural volume growth. The volume of E-way bills also recorded an all-time high in October, driven by festive demand. Data from the Federation of Automobile Dealers Associations (FADA) shows that passenger vehicle sales grew by 32.4 per cent in October 2024. Rural demand seems to have strengthened further in October. Tractor sales grew by 22.4 per cent YoY in October 2024. An analysis by FADA on India's 42-day festive period shows that two-wheeler sales were particularly robust, increasing by 11.8 per cent YoY, driven by strong rural demand.

Domestic food price pressures due to temporary supply disruptions

Consumer price inflation increased to 6.2 per cent in October 2024, primarily driven by inflation in a few vegetables, oil, and fats. Pressures continued in tomatoes, onions, and potatoes due to supply disruption caused by heavy rains in major producing states and tighter market stock amid lower output last year. The increase in oil and fat inflation is largely driven by imported inflation from elevated international prices of edible oils. On the positive side, a continuous easing trend is visible in pulses, spices and sugar. The inflation rate in spices remains in the negative territory. Core inflation rose to 3.8 per cent in October, but stayed lower than last year, remaining at comfortable levels.

Robust food grain production and MSPs hikes to strengthen rural economy

- As per the First Advance Estimates, production of major Kharif crops for 2024-25 is estimated at a record 164.7 million tonnes, higher by 5.7 per cent compared to 2023-24 and 8.2 per cent higher than the average food grain production in the past five years. The estimated increase is mainly on account of the rise in rice, maize, coarse grains and oilseeds output. Despite increased acreage, pulse production estimates remain marginally lower, primarily due to crop damage from excessive rains in key producing regions.
- The Government increased the Minimum Support Prices (MSPs) of various crops for both Kharif and Rabi seasons. For the Kharif marketing season 2024-25, the increase in MSPs was in the range of 1.4 per cent to 12.7 per cent while the MSPs for the Rabi marketing season 2025-26, were higher in the range of 2.4 per cent to 7.0 per cent. The increase is likely to incentivise crop diversification and support farmers' income. As of 6th November 2024, paddy procurement reached 161.0 lakh metric tonnes, benefiting 14.79 lakh farmers from the ongoing KMS procurement operations. The record Kharif food grain production with increased MSPs will further strengthen the rural economy.
- Announcement of higher MSPs is likely to encourage healthy rabi sowing. The availability of inputs for the rabi sowing season is reported to be adequate, which bodes well for the upcoming agricultural activities. Quality seed availability surpasses the requirement by 30.9 lakh quintals of seeds, ensuring ample supply for sowing. Fertiliser availability remains in a comfortable position as of 28 October 2024. The closing stock of all major fertilizers was above the required levels, except for di-ammonium phosphate which was largely due to geopolitical factors causing vessels to take longer routes, resulting in delayed availability.
- Adequate storage in the reservoir has ensured a steady supply of water for crop irrigation. As of 7 November 2024, reservoir storage levels in all regions, except the Northern region, were higher than the corresponding period last year and exceeded normal storage levels. Tractor sales volume reached an all-time high in October,

registering a double-digit YoY growth. This was driven by favourable conditions set by the healthy monsoon, bumper kharif harvest and higher MSP announcements on major rabi crops

• Going ahead, the inflation trajectory will largely be influenced by the price movements in edible oils, tomato, onion and potato. On the positive side, the early trend visible in vegetable prices in November so far signals significantly lower inflation in tomato and onion. The estimate of bumper kharif production is likely to lower food inflation in the upcoming months. On the other hand, international edible oil prices are currently on an upward trend, and its reflection is visible in the domestic prices as well.

Tensions and policy uncertainty may limit global trade rebound

• The United Nations Conference on Trade and Development (UNCTAD)'s, latest 2024 Trade and Development Report 20248 points out that after experiencing a contraction in 2023, international trade in goods and services is expected to rebound by 2 per cent to 3

per cent in real terms in 2024. The UNCTAD nowcast model has predicted the value of global exports to approach nearly USD 32 trillion in 2024. However, regional developments are likely to be uneven. While global trade revenues are rising again, they are not expected to exceed the record levels achieved in 2022. This is mainly due to a decline or stagnation, in real terms, in exports from most of the developed countries and a fall in key international commodity prices. According to the report, several leading indicators also signal weaker prospects for merchandise trade in the coming quarters. For example, the October release of the global manufacturing Purchasing Managers' Index showed that the new export orders component has decreased for the fifth consecutive month

Trade in services remains dynamic

UNCTAD has noted that the outlook for service trade in 2024 is relatively more positive than that for merchandise trade. World services exports (in dollar terms) increased by 9 per cent in Q1 of 2024 (on a seasonally adjusted annualized rate) compared to the previous quarter. Notably, high carbon emissions-intensive services experienced even faster growth, with travel and transport services expanding by 18 per cent and 15 per cent, respectively. Other commercial services saw a growth of 5 per cent in the same quarter. For the remainder of 2024, (Q2-Q4) service trade is expected to continue expanding, with projected growth rates of 2 to 5 per cent (QoQ) significantly lower than the growth rate observed in Q1 of 2024. Revenue from services exports is expected to increase by 6 per cent in 2024 on a YoY basis.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between the same time periods. India's current account deficit (CAD) narrowed to 0.7% of GDP in FY24. The CAD stood at US\$ 9.7 billion for Q1 2024-25 from US\$ 8.9 billion in Q1 2023-24 or 1.1% of GDP. This was largely due to a decrease in the merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Road Ahead

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2024-25, capital expenditure took the lead by steeply increasing the capital expenditure outlay by 17.1 % to Rs.11 lakh crore (US\$ 133.51 billion) over Rs. 9.48 lakh crore (US\$ 113.91 billion) in 2023-24. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

OVERVIEW OF INFRASTRUCTURE SECTOR INDIA

India's high growth imperative in 2023 and beyond will significantly be driven by major strides in key sectors with infrastructure development being a critical force aiding the progress. Infrastructure is a key enabler in helping India become a US\$ 26 trillion economy. Investments in building and upgrading physical infrastructure, especially in synergy with the ease of doing business initiatives, remain pivotal to increasing efficiency and costs. Prime Minister Mr Narendra Modi also recently reiterated that infrastructure is a crucial pillar to ensure good governance across sectors. The government's focus on building the infrastructure of the future has been evident given the slew of initiatives launched recently. The US\$ 1.3 trillion national master plan for infrastructure, Gati Shakti, has been a forerunner to bring about systemic and effective reforms in the sector and has already shown a significant headway. Infrastructure support to the nation's manufacturers also remains one of the top agendas as it will significantly transform goods and exports movement making freight delivery effective and economical. The "Smart Cities Mission" and "Housing for All" programmes have benefited from these initiatives. Saudi Arabia seeks to spend up to US\$ 100 billion in India in energy, petrochemicals, refinery, infrastructure, agriculture, minerals, and mining. The infrastructure sector is a key driver of the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from the Government for initiating policies that would ensure the time-bound creation of world-class infrastructure in the country. The infrastructure sector includes power, bridges, dams, roads, and urban infrastructure development. In other words, the infrastructure sector acts as a catalyst for India's economic growth as it drives the growth of the allied sectors like townships, housing, built-up infrastructure, and construction development projects. To meet India's aim of reaching a US\$ 5 trillion economy by 2025, infrastructure development is the

need of the hour. The government has launched the National Infrastructure Pipeline (NIP) combined with other initiatives such as 'Make in India' and the Production-Linked Incentives (PLI) scheme to augment the growth of the infrastructure sector. Historically, more than 80% of the country's infrastructure spending has gone toward funding for transportation, electricity, water, and irrigation. While these sectors still remain the key focus, the government has also started to focus on other sectors as India's environment and demographics are evolving. There is a compelling need for enhanced and improved delivery across the whole infrastructure spectrum, from housing provision to water and sanitation services to digital and transportation demands, which will assure economic growth, increase quality of life, and boost sectoral competitiveness.

Market Size

In December 2022, AAI and other Airport Developers have targeted a capital outlay of approximately Rs. 98,000 crores (US\$ 11.8 billion) in the airport sector in the next five years for expansion and modification of existing terminals, new terminals and strengthening of runways, among other activities.

India currently has the fifth-largest metro network in the world and will soon overtake advanced economies such as Japan and South Korea to become the third-largest network. The Metro rail network reached 810 kms and is operational in 20 cities.

In the last 10 years, 697 km have been added to Metro Rail Network across the country. In 2024, about 945 km of metro rail lines are operational in 21 cities and 919 km is under construction in 26 different cities.

The Indian logistics market is estimated to touch US\$ 320 billion by 2025. The overall infrastructure capex is estimated to grow at a CAGR of 11.4% over 2021-26 driven by spending on water supply, transport, and urban infrastructure. Investment in infrastructure contributed around 5% of the GDP in the tenth five-year plan as against 9% in the eleventh five-year plan. Further, a US\$ 1 trillion investment in infrastructure was proposed by India's planning commission during the 12th five-year plan, with 40% of the funds coming from the private sector.

Road Ahead

With a 37% increase in the current fiscal year, capital expenditures (capex) are on the rise, which bolsters ongoing infrastructure development and fits with 2027 goals for India's economic growth to become a US\$ 5 trillion economy. In order to anticipate private sector investment and to address employment and consumption in rural India, the budget places a strong emphasis on the development of roads, shipping, and railways.

Global investment and partnerships in infrastructure, such as the India-Japan forum for development in the Northeast are also indicative of more investments. These initiatives come at a momentous juncture as the country aims for self-reliance in future-ready and sustainable critical infrastructure.

India, it is estimated, needs to invest US\$ 840 billion over the next 15 years into urban infrastructure to meet the needs of its fast-growing population.

This investment will only be rational as well as sustainable if we additionally focus on long-term maintenance and strength of our buildings, bridges, ports, and airports.

As a result of digitalisation and opportunities that tier II and III cities present for economic growth, the divide between metro and non-metros is blurring, moving to the new era of infrastructure growth. Commercial real

estate properties have witnessed exponential growth in demand across Tier II & III cities as Information technology and Information technology-enabled services and banking financial services and insurance-focused organizations are increasingly decentralizing their operations to adapt to the new normal.

The residential sector has witnessed good sales, and launches have also shown signs of an uptick during 2022, total sales in the top 7 cities were projected to exceed 360,000 units in 2022.

Civil Aviation Ministry's "Vision 2040" report states that there will be 190-200 functioning airports in India by 2040. Delhi and Mumbai will have three international airports each, while the top 31 Indian cities will have two operational airports each.

220 destinations (airports/heliports/water aerodromes) under UDAN are targeted to be completed by 2026 with 1000 routes to provide air connectivity to unconnected destinations in India.

India's Infrastructure forms an integral part of the country's economic ecosystem. There has been a significant shift in the industry that is leading to the development of world-class facilities across the country in the areas of roads, waterways, railways, airports, and ports, among others. The country-wide smart cities programmes have proven to be industry game-changers. Given its critical role in the growth of the nation, the infrastructure sector has experienced a tremendous boom because of India's necessity and desire for rapid development. The expansion has been aided by urbanisation and an increase in foreign investment in the sector.

The infrastructure sector has become the biggest focus area for the Government of India. India's GDP is expected to grow by 8% over the next three fiscal years, one of the quickest rates among major, developing economies, according to S&P Global Ratings. India and Japan have joined hands for infrastructure development in India's Northeast states and are also setting up an India-Japan Coordination Forum for the development of the Northeast to undertake strategic infrastructure projects for the region.

India being a developing nation is set to take full advantage of the opportunity for the expansion of the infrastructure sector, and it is reasonable to conclude that India's infrastructure has a bright future ahead of it.

Interior Design Industry in India

Interior design encompasses understanding, organising and enhancing the internal architecture of human-made spaces, thus combining the arts and science. It includes activities such as conceptual development, site assessment, research, project management, spatial planning and design execution.

Interior decorators then perform these activities after analysing interior space requirements. The decorators select stylistic elements such as colour schemes, lighting or materials for comfort, and functionally efficient yet visually pleasing environments. As a result, there is now widespread acceptance of interior design in both residential and commercial structures, driven by enhanced space efficiency and functionality.

Evolution of India's Interior Design Industry

India's interior design industry has experienced a transformation over the past few decades. Driven by rapid urbanisation, rising disposable incomes and evolving lifestyle preferences, the industry has emerged as a crucial contributor to the country's economy

The future of the Indian interior design market appears exceptionally promising, with industry experts projecting a market size of US\$ 81.2 billion by 2030, translating into a significant CAGR of 14.3%.

Factors Contributing to the Success of Interior Design Market in India

- **Economic growth and increasing disposable income**

India's expanding middle class with its higher-than-before disposable incomes has played an important role in the development of the interior design industry. The spending power of people has increased, leading to an upsurge in demand for services such as interior design. This has resulted in more opportunities for interior designers and companies, thus driving competition and promoting innovation within the industry.

- **Booming real estate market**

India's urban population is growing rapidly. Data from the World Bank shows that India's urban population increased from 31.16% of the overall population in 2011 to 34.03% by 2020 and is estimated to reach 40.0% by 2030. The increase in urban population has fuelled a surge in the need for residential properties while an increasing workforce amid a booming economy has compelled companies to invest more in their infrastructure. According to research by the IMARC Group, India's real estate market was worth US\$ 280 billion in 2023 and is set to rise to US\$ 562 billion by 2032. The rise in urban population and growth in the real estate market directly links with interior design service requirements as homeowners and businesses always seek attractive and functional workspaces.

Property sales in India in CY2023 reached record highs, hitting 26% YoY growth with 271,818 units sold across the top seven cities in the country.

As real estate prices soar, effective space management becomes essential. Professional interior designers optimise smaller areas, thus enhancing functionality and aesthetics, making the most of limited space in modern living.

- **Influence of social media and technological innovations**

The demand for interior designers is also driven by the trends of smart homes, social media and changing lifestyles. Homes and businesses prefer theme-based designs with trends such as Mediterranean, European or Ethnic Indian styles. New technologies such as virtual reality have disrupted the interior design industry, enabling both clients and designers to visualise and experiment with ideas, although these technologies are not adopted by mass due to their high costs.

- **Changing lifestyle preferences**

Modern Indian consumers are increasingly exposed to global trends and lifestyles. Platforms like Instagram and Pinterest have become significant trend influencers, showcasing the latest in interior design and home décor. This exposure has led to a shift in consumer preferences, with a growing emphasis on contemporary and innovative design solutions.

Government Initiatives

There are various measures and policies introduced by the government of India which indirectly supports the growth of the interior design industry. The Pradhan Mantri Awas Yojana (PMAY) launched in 2015 targets

affordable housing for all by 2022. Moreover, In the Union Budget for 2024-25, a sum of Rs. 30,170 crore (US\$ 3.60 billion) has been allocated to Pradhan Mantri Awas Yojana (Urban) 2.0, including Rs. 4,000 crore (US\$ 477 million) specifically for Credit Linked Subsidy Scheme (CLSS). This is expected to further augment the growth in the construction of residential houses thereby increasing the demand for interior design services. This smart city mission transforms about one hundred urban areas spread across India; thus, allowing designers to create inventive sustainable environments.

- **India Design Council**

The India Design Council, an independent entity under the Government of India operating within the Department of Industrial Policy & Promotion, Ministry of Commerce & Industry, serves as the country's premier organization for diverse design disciplines. Its primary mission is to advocate for design, aiming to transform India into a nation driven by design. Leading the way in shaping the country's design landscape, the India Design Council collaborates with governmental bodies, the design sector, businesses, educational institutions, and society to advance design in commerce, public services, and community development while fostering design innovation.

- **Design (Amendment) Rules, 2021**

In order to encourage startups and small businesses to safeguard their designs and encourage more design registrations, fees have been lowered in a manner similar to the adjustments made in the Patent and Trademark regulations.

OUR SERVICES

1. Works Contract (Structural Repairs, Restoration, Retrofitting)

➤ Structural Repairs and Restoration

Structural Repairs are carried out to structures which exhibit structural damage in concrete section. Some of the techniques used for Structural Repairs and Restoration works are:

- Jacketing is used to strengthen weak and distressed RCC members which have been deteriorated. In this method, extra rebars are provided and the cross-sectional area is increased to increase the compressive strength by using concrete of a specified prescribed grade
- Polymer Modified Mortar Treatment is one where we remove all loose particles of mortar, concrete, rust, etc. from the spoiled surface and apply polymer-modified mortar over the specific surface as per the manufacturer's specification
- Micro concreting is used as a repair for damaged reinforced concrete elements like beams, columns, walls, etc. where the loss of cover concrete is significant and where the compaction is not possible.
- Thixotropic Mortar Treatment
- Fibre wrapping; Epoxy Grouting; Cement grouting
- Carbon/ Glass Laminates fixing

➤ Water Proofing

Waterproofing is the method of forming a barrier over surfaces of foundations, roofs/ terraces, walls and other structural members of buildings to prevent water penetrations through these surfaces.

- Brickbat Coba is one of the most common waterproofing treatments which is generally used for waterproofing roofs, terraces and toilet. In this, all existing treatment on the slab top is removed & a layer of brick bats is laid. The gaps are filled with cement sand mortar & mixed with water proofing chemical and above this IPS is done with false square marking and in some cases, the final layer of the China mosaic tiles is also laid, which not only contributes to aesthetics but also provides heat insulation.
- Polyurethane (popularly known as PU) coating is highly elastic with excellent heat resistance in addition to preventing water ingress. This property of polyurethane makes it suitable as a waterproof coating.
- Cementitious waterproofing system is cement-based modified with acrylic polymers. While the cementitious materials provide the tensile strength, polymers improve elastic and adhesion properties.
- Ethylene, propylene, diene terpolymer (EPDM) is an elastomeric compound or synthetic rubber compound and is one of the most effective waterproofing systems. The membrane is highly durable. EPDM system is suitable for a wide variety of waterproofing applications like roofs, pond lining etc.
- Strengthening of damaged concrete and filling of cracks is required along with injection grouting

The adoption of treatment from above is at the discretion of the Consultant & Client.

A BOT contract involves three phases:

- **Build:** The concessionaire i.e. us is responsible for financing, designing, and constructing the building project. This phase usually includes obtaining the necessary permissions, approvals, appointing various consultants, construction and finally getting the completion certificate/ occupation certificate.
- **Operate:** After the construction is completed, the concessionaire operates and maintains the facility for a specified duration and Sub leases the commercial/residential shops/offices/flats for generation of the revenue.
- **Transfer:** At the end of the contract period, the ownership and control of the facility are transferred back to the government or public authority, which may have been the original owner.

Our Company has successfully completed the first BOT Project of the Municipal Authority in Maharashtra for the Construction of a commercial complex and Municipal Offices for Pen Municipal Council and was awarded by Shri Ajit Pawarji for exclusive commercial "BOT" Project named "Center Point" at Pen, Maha Mumbai. Now the name is "Sharad Pawar Bhavan"

Maintenance work generally includes Inspection of buildings, systems, etc. regularly to identify potential issues, Troubleshoot any issues, Repair faulty things or schedule repairs, Make minor building repairs, such as fixing drywall or repairing doors, and Implement the maintenance budget. These activities may vary

from *Routine maintenance works* that must be done on a regular rotation basis in order to maintain the function or appearance of some aspects of the building or ensure inspections are completed to identify the need for more significant work to *Preventive maintenance activities* that are completed proactively in order to prevent or slow wear, tear, and deterioration and thereby reducing the major cost on major repairs.

COMPANY'S STRENGTHS

1. *Established Reputation*

It is a critical strength for a company because it fosters trust, attracts customers and partners, enhances employee satisfaction and provides a buffer during difficult times, all of which contributes to the long-term success and stability of the business. Company's strong track record and experience in delivering successful government projects helps in building trust amongst customers.

2. Specialized Skills

The company's specialized in navigating procurement processes, ensuring regulatory compliance, managing project risks, controlling budgets, and meeting stringent deadlines and quality standards by adhering to ISO requirements and Building Relationship in the context of government contracts refers to the unique expertise, technical abilities and knowledge that are specifically relevant to securing, managing, and executing government projects. These skills often require a deep understanding of the nuances of government procurement processes, regulations and contract management, which differ significantly from private-sector contracting. Possessing specialized skills is a major asset for a company that can help it stand out in a highly competitive and regulated field. These skills enable the company to navigate complex procurement processes, comply with government regulations and deliver quality services or products while meeting strict deadlines and standards.

3. Strong Network

The company has established strong relationships and connections within government agencies and with industry partners. These relationships provide critical advantages in securing contracts, gathering market intelligence, navigating the procurement process, and fostering collaboration with other entities. The network plays a key role in helping the company to identify opportunities, enhance their reputations and build long-term business growth in the government sector.

4. Financial Stability

The company has ability to maintain solid financial health, ensuring it has the necessary resources to invest in projects, manage operational costs, and endure economic fluctuations or unexpected financial challenges. In the context of government contracting, financial stability is a critical strength that enables companies to meet the demand of large, often long-term government contracts, as well as adapt to the complexities and uncertainties inherent in these contracts.

WEAKNESS

1. Dependency on Government contracts

Dependency on government contracts refers to a situation where a company relies heavily on government contracts for a significant portion of its revenue. While government contracts can provide stability and long-term business opportunities, they also expose the company to vulnerabilities stemming from shifts in government priorities, policy changes, or budgetary fluctuations. Besides this, for any reason, if the Government bars the company in bidding, the entire revenue/ sales of the company cease.

2. Bureaucratic challenges

Bureaucratic challenges are a significant weakness for businesses involved in government contracting. These challenges ranges from slow procurement cycles and complex regulations to rigid contract terms which can result in delays, increased costs, and lost opportunities, especially for companies that lack the internal resources or expertise to navigate them effectively. To address these weaknesses, the company must invest in compliance expertise, streamline internal processes, diversify revenue streams, and consider external support when necessary. By mitigating the impact of bureaucratic inefficiencies, the

company can improve their competitiveness, reduce operational risk, and enhance their long-term success in the government contracting space.

3. Limited Innovation

Limited innovation in the context of government contracting can be seen as a weakness when businesses are hindered by a tendency towards conservatism or reluctance to adopt innovative practices, particularly due to the regulatory constraints imposed by government contracts. While innovation is often seen as a driving force for growth, efficiency, and competitiveness, the nature of government contracts—especially in heavily regulated industries—can create barriers that prevent companies from exploring or adopting new approaches, technologies, or business models.

4. Dependence on key personnel

Company relies heavily on promoters and Director and select group of highly skilled or experienced staff to manage critical functions, execute specialized tasks or build and maintain client relationships. If key personnel leave, whether due to retirement, resignation, illness or any other reason, it can disrupt business continuity, after performance, and jeopardize contract fulfilment. This dependence on specific individuals also exposes companies to risks related to skill shortages or recruitment challenges.

5. Dependency on Government Fund:

The payment of the sales is dependent on the availability of the fund with various Government Departments. If the Government for any unforeseen reason decides to not allot us less allot the fund to the work undertaken by the company, the cash flow of the company can be affected badly and can increase interest burden and may invite litigation.

OPPORTUNITIES

1. Emerging Technologies

Emerging technologies present significant opportunities for company to enhance service delivery, streamline processes, and improve overall efficiency. As the pace of technological advancement accelerates, companies can leverage new technologies to gain a competitive edge, meet the evolving needs of government agencies, and drive innovation in the sector. Adopting these technologies, can improve the quality and speed of service delivery, reduce costs, and respond more effectively to the complex and often dynamic demands of government contracts.

2. Government Initiatives

Government initiatives aimed at promoting small business participation or supporting minority-owned enterprises (MBEs) offer valuable opportunities for the company. These initiatives can provide access to contracts, funding, and resources that might otherwise be difficult for small or minority-owned businesses to obtain, levelling the playing field in competitive government contracting markets.

THREATS

1. Regulatory Changes

Regulatory changes are a significant risk for the company, as shifts in government regulations, policies, or compliance requirements can have immediate and often costly impacts on operations. Contractors that work with government agencies are subject to a wide range of laws, rules, and regulations that govern everything from contract performance to environmental standards, labour practices, and security

measures. When these regulations change, the company may face unexpected compliance costs, operational disruptions, or legal risks.

2. Cybersecurity threats

It is a critical risk for the company, as it handles sensitive government data or infrastructure projects. Given the increasing frequency and sophistication of cyberattacks, company must prioritize cybersecurity to protect both their own and the government's data from theft, loss, or unauthorized access. A data breach or cyberattack not only exposes the company to legal and financial risks but also threatens the trust and reputation necessary to maintain business relationships with government clients.

The company has taken following measures in relation to above threats:

1. Hardware firewall is installed for additional security;
2. Server is not directly connected to internet;
3. USB use is disabled at all the terminals except few HOD who can access the sensitive data;
4. Entire offices are under CCTV surveillance.

3. Political instability

Changes in government leadership, policy direction, or political priorities can introduce uncertainty, disrupt business operations, and alter the dynamics of government procurement. As the Company is working in infrastructure it is especially vulnerable to shifts in political power, as government spending and priorities can change quickly with new administrations or political upheaval.

4. Litigation risks

Legal challenges can lead to costly delays, reputational damage and financial loss. These risks can arise from disputes related to contract performance, compliance issues, or procurement processes. The nature of government contracting, which often involves large, high-stakes projects with strict regulatory and performance requirements, makes the company vulnerable to legal action if it fails to meet obligations, adhere to regulations, or navigate the complexities of public procurement processes correctly.

RAW MATERIAL

The building and construction industry relies on a wide range of raw materials to create durable, efficient, and aesthetically pleasing structures. These materials form the foundation of all construction projects, from residential buildings to large-scale infrastructure developments. They can be broadly categorized into structural materials, finishing materials, waterproofing and insulation materials, wood and timber products, and plumbing and electrical materials.

Structural materials such as cement, steel, and aggregates are fundamental for the integrity of any structure. Cement is critical for concrete production, steel provides strength and flexibility for reinforcement and framing, and aggregates like sand, gravel, and crushed stone are essential for creating concrete and asphalt. Finishing materials, including bricks, blocks, tiles, paints, and coatings, add the necessary aesthetic and functional elements to walls, floors, and surfaces.

Waterproofing and insulation materials, such as bitumen and polyurethane foam, play a significant role in protecting buildings from water damage and regulating temperature. Similarly, wood and timber products, including plywood and laminates, offer versatility and decorative options for furniture and paneling. Plumbing and electrical materials, such as pipes, fittings, wires, and cables, are essential for operational systems in modern buildings.

When selecting raw materials, several factors must be considered. Quality is paramount for ensuring structural safety and longevity, while sustainability encourages the use of eco-friendly and recyclable materials. Cost is another critical factor, requiring a balance between budget constraints and material performance. Additionally, local availability can reduce transportation costs and support local economies.

Emerging trends in raw materials reflect the industry's push toward innovation and sustainability. Green building materials like recycled aggregates and bamboo offer eco-friendly alternatives. Advanced materials such as self-healing concrete and lightweight steel enhance structural performance, while innovative insulation options like aerogels and phase change materials improve energy efficiency.

However, challenges in managing raw materials persist, including fluctuating prices due to supply chain disruptions, maintaining consistent quality across suppliers, and adhering to environmental regulations. Overcoming these challenges requires strategic planning and continuous improvement.

Ultimately, the choice of raw materials significantly influences the success of a construction project. By staying informed about new developments and integrating sustainable practices, the building and construction industry can enhance efficiency, reduce environmental impact, and build a resilient future.

RELATED TO OUR BUSINESS

The Real Estate (Regulation and Development) Act, 2016 (RERA)

The Real Estate (Regulation and Development) Act, 2016 (RERA) was enacted to promote transparency, accountability, and efficiency in the real estate sector. It mandates the registration of real estate projects and real estate agents with the RERA authority to ensure that developers deliver on their promises regarding project completion and quality. The act also aims to protect homebuyers by setting strict guidelines for builders, including the requirement to provide accurate project details, adherence to approved plans, and compliance with construction timelines. RERA helps create a more structured framework where buyers have access to vital information, including the project's legal standing and financial progress, reducing the risk of delays and fraud.

In addition, RERA establishes a dispute resolution mechanism to address complaints from buyers and developers, offering a fast-track grievance redressal process. Developers are now required to deposit 70% of the funds collected from buyers into a separate escrow account, ensuring that the money is used solely for the intended project. Penalties for non-compliance under the Act are stringent, including fines and imprisonment for serious violations. As a result, RERA has significantly contributed to improving consumer confidence and boosting investment in the real estate sector by promoting fairness and accountability.

The Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation, and Resettlement Act, 2013 (LARR Act)

The Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation, and Resettlement Act, 2013 (LARR Act) was enacted to address the concerns of landowners and affected families during the process of land acquisition for public purposes or industrial projects. The Act emphasizes fairness, ensuring that landowners receive compensation that is at least twice the market value in urban areas and four times in rural areas. It also mandates a Social Impact Assessment (SIA) before any acquisition, ensuring that the government evaluates the impact on communities and the environment. Additionally, public hearings and consent from affected families are required, particularly for private projects, ensuring a more democratic and transparent approach.

The LARR Act also includes robust provisions for the rehabilitation and resettlement of displaced families. Beyond monetary compensation, affected families are entitled to alternative housing, employment opportunities, and other forms of support to help them rebuild their lives. The Act ensures that acquisition does not happen at the expense of the livelihoods and well-being of landowners and communities. By introducing stricter regulations, it seeks to reduce disputes and enhance trust in the land acquisition process, offering a balanced approach between development needs and the rights of landowners.

Micro, Small, and Medium Enterprises Development (MSMED) Act, 2006

The Micro, Small, and Medium Enterprises Development (MSMED) Act, 2006 is a landmark legislation in India designed to foster the growth and development of micro, small, and medium enterprises (MSMEs), which are vital to the country's economic progress. The Act provides a clear classification of MSMEs based on their investment in plant and machinery or equipment and annual turnover. It defines micro enterprises as those with investments up to ₹1 crore and turnover up to ₹5 crore, small enterprises with investments up to ₹10 crore and turnover up to ₹50 crore, and medium enterprises with investments up to ₹50 crore and turnover up to ₹250 crore. This classification is crucial for determining eligibility for various support measures and incentives under the Act.

The MSMED Act, 2006 also establishes a framework for supporting MSMEs through financial assistance, technology upgradation, and infrastructure development. It includes provisions for the Credit Guarantee Fund to offer collateral-free loans, enhancing access to finance for small businesses. Additionally, the Act promotes the registration of MSMEs to help them benefit from government schemes and subsidies. It also provides mechanisms for dispute resolution and the creation of institutions to support the sector's growth. By streamlining regulatory processes and providing targeted support, the MSMED Act aims to boost entrepreneurship, create jobs, and contribute to sustainable economic development.

Micro, Small, and Medium Enterprises Development (MSMED) Act, 2006

The benefits available to MSME vendors and small business participation in government tenders includes EMD exemption, tender cost exemption, allotment preference, and payments. Here's a breakdown:

1. EMD (Earnest Money Deposit) Exemption

As per Public Procurement Policy for Micro & Small Enterprises (MSEs) Order, 2012, MSMEs registered with NSIC, Udyam Registration, or other valid MSME registration authorities are exempted from paying EMD when bidding for government tenders.

To avail of this exemption, MSMEs must submit their valid MSME certificate/Udyam Registration Certificate (URC) or NSIC certificate with the tender bid.

2. Tender Cost Exemption

Many government departments waive tender document fees for MSMEs to encourage their participation.

Similar to EMD, MSMEs need to provide their registration certificate to claim this benefit.

The exemption is generally applicable to CPSEs (Central Public Sector Enterprises), Railways, Defence, PWD, and other government tenders.

3. MSME Vendor Tender Allotment Preference

As per the Public Procurement Policy, 25% of total annual procurement by central government ministries, departments, and PSUs must be done from MSMEs.

Out of this 25%, 4% is reserved for SC/ST entrepreneurs, and 3% for women entrepreneurs.

In tenders where price preference is applicable, MSMEs may get an advantage if their quoted price is within L1 + 15% (lowest bid + 15%) and they are willing to match L1.

4. MSME Payment Terms

As per MSME Development Act, 2006, government departments and large enterprises must make payments to MSME vendors within 45 days from the date of acceptance of goods/services.

Delayed payment beyond 45 days attracts compound interest at three times the bank rate specified by RBI.

MSMEs can register complaints on the MSME Samadhaan portal in case of delayed payments. **Labour Laws**

The remedies available in the event of infringement of a copyright under the Copyright Act include civil proceedings for damages, account of profits, injunction and the delivery of the infringing copies to the copyright owner. Rationale for the decrease in revenue generated from Corporate Interiors segment and BOT segment in FY2025

CORPORATE INTERIORS – FY 2024-25

The revenue from the corporate Interiors segment declined in FY 2024-24, primarily due to reduction in tenders awarded to the company. This led to reduction of 10.86% revenue from corporate interiors.

BOT SEGMENT – FY 2024-25

The company did not bid for any new BOT projects during the year, as they were assessed to be financially unviable. For existing projects, a customer sale agreement was executed; however, revenue was not recognized due to pending fulfillment of criteria under the company's revenue recognition policy. The details of the same are mentioned Annexure 34 of "Financial Information" on page 256 of Prospectus.

Rationale for the decrease in revenue generated from Corporate Interiors segment in FY2023 and the BOT segment in FY2024:

CORPORATE INTERIORS – FY 2022–23

The revenue from the Corporate Interiors segment declined significantly in FY 2022–23, primarily due to a

reduction in the overall order inflow and the Company's total turnover during the year. The Company's revenue from operations stood at Rs. 6,302.02 lakhs, as compared to Rs. 9,266.45 lakhs in FY 2021–22, reflecting a 31.99% decrease. The key contributing factors were as follows:

- **Low Opening Order Book:** As on March 31, 2022, the order book for the interiors segment stood at only Rs. 10.22 crore, which limited the revenue potential for the ensuing financial year.
- **Limited Tender Awards:** Although the Company participated in 62 interior tenders worth approximately Rs. 176.85 crore during FY 2022–23, it secured only 9 tenders, collectively valued at Rs. 20.05 crore. This low conversion rate significantly impacted segmental revenue.
- **Political Instability:** The State of Maharashtra experienced a period of political uncertainty, including the split of a major political party and a shift in the ruling coalition. This instability led to a noticeable decline in the issuance of high-value government tenders.
- **Intensified Market Competition:** With fewer tenders available, the market became highly competitive. Many infrastructure players resorted to undercutting prices to win contracts, making it difficult for the Company to secure projects at sustainable margins.

BOT SEGMENT – FY 2023–24:

The Company had undertaken a single BOT project, for which the Occupancy Certificate (OC) was obtained in February 2023. As per the project completion method of accounting, the revenue from units sold prior to obtaining the OC was recognized in FY 2022–23. Units sold after the OC, during FY 2023–24, were accordingly recognized in that fiscal year. However, since a significant portion of the revenue was already recognized in the earlier year, therefore the contribution from the BOT segment was lower in FY 2023–24.

Additionally, no new BOT projects have been awarded or undertaken by the Company in the past three years. As a result, maximum revenue from the existing project has already been recorded in FY 2022-23, leading to a natural decline in revenue from this segment in FY 2023–24.

PAT margins of the company were increased from 6.41% in FY 2022-23 to 11.41% in FY 2023-24. This was due to the following reasons as mentioned below:

1. Reduction in Finance Cost:

During FY24, the Company repaid major portions of its short-term borrowings, resulting in a considerable decline in interest expenses. Finance costs reduced both in absolute terms and as a percentage of revenue—from 3.93% in FY23 to 1.19% in FY24. This reduction significantly boosted net profitability and contributed approximately 88.4% to the overall increase in PAT.

Adjusted PAT Margin after interest:

FY24: 12.64%

FY23: 10.53%

2. Non-recurrence of Exceptional Expenses:

In FY23, the Company incurred several one-time expenses, including:

GST demand of Rs.233.68 lakhs

Write-off of debtors/advances worth Rs.55.96 lakhs

The absence of such exceptional items in FY24 helped control other expenses and improve the overall profit margin.

3. Improved Project Mix and Margin:

The Company executed a more profitable set of projects during FY24 compared to the prior year. In FY23, a portion of revenue was derived from a BOT (Build-Operate-Transfer) project with only 2% margin, which accounted for approximately 9.82% of total revenue, thereby diluting overall margins. In contrast, FY24 projects had significantly better profitability profiles, boosting bottom-line performance.

4. Impact of Deferred Tax Adjustment:

Deferred tax accounting also played a role in PAT movement. In FY23, there was a deferred tax expense of Rs.26.08 lakhs, whereas in FY24, there was a deferred tax income of Rs.22.83 lakhs, further contributing positively to the net profit.

Commissioner CGST & C.Ex., Mumbai West vs Mahendra Realtors & Infrastructure Private Limited (Service Tax/86831/2018)

The present appeal arises from the Order-in-Original No. MUM/CGST/MW/COMMR/21/2017-18 dated 11.12.2017, wherein the adjudicating authority declined to confirm the demand of Rs. 3,74,78,621/-, leading to the present challenge by the revenue. The revenue contends that the adjudicating authority failed to properly analyze the facts and legal issues, resulting in an erroneous order that has adversely impacted the interests of the revenue. The primary issue for consideration is whether the Commissioner's decision to not confirm the demand was justified and whether the said order warrants interference by the Hon'ble CESTAT. Further, the appeal seeks adjudication on whether, under Section 86 of Chapter V of the Finance Act, 1994, the matter ought to be remanded back to the adjudicating authority for a reasoned and speaking order or if any other appropriate directions are warranted. The dispute primarily pertains to alleged non-payment or short payment of service tax, along with interest and penalties, arising from certain transactions undertaken by the Company. The revenue has asserted that the Company failed to discharge its statutory tax obligations, thereby leading to the issuance of the demand notice. However, the adjudicating authority, upon review of the submissions and records, found that the demand was not sustainable in its entirety and consequently passed the impugned order rejecting the demand. The revenue, aggrieved by this finding, has preferred the present appeal before the Hon'ble CESTAT, where the matter remains pending for adjudication. The next date in the matter is yet to be notified.

g) Mahendra Realtors & Infrastructure Private Limited vs The New India Assurance Co. Ltd & Ors (Consumer Complaint/454/2021)

The complainant, a private limited company engaged in civil engineering and contracting, had obtained a Contractor's All Risk (CAR) insurance policy from the opponent insurance company through its agent, M/s Suyash Insurance Booking LLP, to cover risks related to repair and rehabilitation work on minor bridges in Surat. In June 2021, due to seasonal rains, construction materials worth Rs. 10,65,234.21 were washed away at the Pandesara bridge site. The complainant promptly reported the incident and filed a claim under the insurance policy. Initially, M/s Suyash Insurance Booking LLP acknowledged the claim and stated that after deducting the minimum excess of Rs. 7.5 lakhs, Rs. 3 lakhs would be payable. However, the insurance company later rejected the claim outright, citing a different policy clause that set a minimum excess of Rs. 25 lakhs for losses due to acts of God (AOG), thereby nullifying the claim.

The complainant alleges that the insurance company's rejection was arbitrary, illegal, and based on false

presumptions without proper investigation. It argues that the insurance broker and the insurer acted in bad faith by first acknowledging partial liability and later repudiating the claim without appointing a surveyor. The complainant further contends that the excess clause imposed is oppressive and unfair, as the policy was specifically taken to cover unforeseen damages at a known wet worksite. After receiving no satisfactory response to a legal notice, the complainant has sought reimbursement of Rs. 10,65,234.21 along with interest and an additional Rs. 5 lakhs as compensation for mental agony and hardship. The matter was last listed on 12.06.2025. The next date in the matter is 10.10.2025.

4. Litigation/Matters involving Tax Liabilities:

Mahendra Realtors & Infrastructure Private Limited vs The Commissioner CGST, Mumbai West (Service Tax/85943/2018)

The Appellant has preferred the present appeal under Section 86 of the Finance Act, 1994, challenging a portion of Order-in-Original No. MUM/CGST-MW/COMMR/21/2017-18, dated December 11, 2017, passed by the Commissioner of CGST, Mumbai West. The impugned order confirms a demand for service tax amounting to Rs. 14,40,147/- under Section 73(2) of the Finance Act, 1994, along with interest under Section 75 and imposes penalties of Rs. 14,40,147/- and Rs. 10,000/- under Sections 70 and 77, respectively. The Appellant seeks to set aside the said portion of the order on the grounds that the confirmation of demand and imposition of penalties are erroneous, arbitrary, and contrary to the settled principles of law. The Appellant submits that the findings of the Commissioner are legally unsustainable and warrant interference by the appellate authority. It is contended that the demand has been raised without due consideration of the factual and legal submissions made by the Appellant and that the penalties imposed are excessive and unjustified. The appeal, therefore, prays for quashing and setting aside the impugned demand and penalties, and for any other reliefs that may be deemed just and proper in the facts and circumstances of the case. The matter is currently pending adjudication and the next date is yet to be notified.

II. Litigations involving Promoters/Directors

A. Against Promoters/Directors

1. Litigation involving Criminal Matters:

Shrikant Arjun Patil vs The Commissioner of Police & Ors (Hemanshu Mahendra Shah) (WP/9850/2024)

The Petitioner has approached the Hon'ble High Court, raising serious allegations against Respondent No.6 ie. Hemanshu Mahendra Shah. The Petitioner has alleged that Respondent No.6, in collusion with various government officials, has been engaging in fraudulent practices to secure tenders from different government departments in Maharashtra. It is contended that Respondent No.6 has been bribing officials, obtaining tenders illegally, and thereafter preparing fake tender receipts, challans, and bills

without completing the requisite work. Further, through manipulation and collusion with authorities, Respondent No.6 is alleged to have transferred public funds into multiple dummy accounts under his control, thereby misappropriating government funds. The Petitioner, who was employed with the company, alleged that he was terminated on 30/10/2018 for refusing to participate in the illegal activities of Respondent No.6. The Petitioner was allegedly threatened that he would be prevented from securing employment elsewhere and that false complaints would be lodged against him with the police authorities. As a result, the Petitioner has made several representations to various authorities, including letters dated 14/08/2023 and 03/05/2023, highlighting the fraudulent activities and misuse of funds by Respondent No.6. It is further alleged that Respondent No.6 fraudulently participated in the Shirur Samruddhi Business Park project issued by Pune Mahanagar Palika (PMC), where he wrongfully utilized 100% of the project space, violating existing rules and conditions. Additionally, Respondent No.6 was awarded a tender by CIDCO, Navi Mumbai, under Work Order No. CIDCO/SP/EE/(PP&Q)/2018/5 dated 01/06/2018 for structural repairs, waterproofing, plumbing, and allied works at Vashi Railway Station Commercial Complex. However, various illegalities were committed while executing the work, and despite multiple complaints, no action was taken by the authorities. The Petitioner has also submitted complaints to the Additional Commissioner of Police, Economic Offences Wing, and the Senior Inspector of Police, Economic Offences Wing, Navi Mumbai, along with evidence substantiating his claims. Despite these efforts, no action has been initiated against Respondent No.6 due to his alleged influence over the authorities. The Petitioner has further annexed a news article from Marathi Network, which reports the fraudulent activities of Respondent No.6. Given the inaction of Respondents No.1 to 5 in addressing the Petitioner's grievances and the serious nature of the allegations, the Petitioner has approached this Hon'ble Court seeking appropriate reliefs under a writ petition under Articles 14, 19, 20, 21, and 226 of the Constitution of India. The matter is currently at the stage of due admission and was last listed for hearing on 08.01.2025. The next date is yet to be notified.

A. Against the Group Entities:

a) Conco Realty Pvt Ltd vs Mahendra Rameehans Infra LLP (Civil Suit/1132/2024)

The present civil suit, bearing Civil Suit No. 1132 of 2024, has been instituted by Conco Realty Pvt. Ltd. (hereinafter referred to as "the Plaintiff") against Mahendra Rameehans Infra LLP (hereinafter referred to as "the Defendant") before the Hon'ble Court. The Plaintiff seeks a declaration that the Deed of Conveyance dated 06.07.2018 is non-est and not binding on the Plaintiff due to the Defendant's failure to comply with the undertaking provided under the said Deed. It is the Plaintiff's case that the Defendant has not fulfilled its contractual and legal obligations, thereby rendering the conveyance deed ineffective and unenforceable. Further, the Plaintiff has sought an injunction restraining the Defendant from creating third-party rights, encumbrances, or any other interest over the suit property situated in Kondvita Village, Andheri East, Mumbai. The suit property comprises various CTS numbers aggregating to 1244.80 sq. meters and includes land and structures, excluding

a bungalow. The Plaintiff contends that any further alienation of the property by the Defendant would cause irreparable harm and prejudice to its rights, necessitating urgent judicial intervention to preserve the status quo. by order dated 14.06.2024, the Hon'ble Court has not granted any interim relief in favor of the Plaintiff. The matter remains pending with the next hearing scheduled for 11.09.2025.

b) Conco Realty Pvt Ltd vs Mahendra Rameehans Infra LLP and Anr (RTS Case No./557/2024)

The present appeal has been filed before the Hon'ble Superintendent of Land Records, Mumbai Suburban, by Conco Realty Private Ltd. (hereinafter referred to as the "Appellant") against Mahendra Rameehans Infra LLP (hereinafter referred to as the "Respondent No.1"). The appeal challenges the order dated 24.06.2024, passed by the Learned City Survey Officer, Vile Parle (hereinafter referred to as "Respondent No.2"), which allowed the application of Respondent No.1 for the mutation of their name in the land records concerning the property situated at Kondvita Village, Andheri East, Mumbai, bearing CTS Nos. 86, 86/1 to 86/8, and 88, aggregating to 1244.80 sq. meters. The Appellant asserts that the said order was issued without proper consideration of the legal and factual position, thereby causing grave prejudice to their rights and interests. The Appellant contends that the mutation of the said property in favor of Respondent No.1 has been granted in an arbitrary manner, without due verification of ownership records, and in contravention of established legal principles governing land mutation. Further, the Appellant submits that the financial transactions and property records submitted by Respondent No.1 contain discrepancies and inconsistencies, particularly concerning post-dated cheques and other supporting documents. The Appellant maintains that these irregularities have not been adequately scrutinized by Respondent No.2, resulting in an erroneous order that warrants appellate interference. Consequently, the Appellant seeks appropriate relief, including the reversal of the impugned order and necessary rectifications in the land records to safeguard their lawful ownership rights over the subject property. The matter is heard and case is dismissed.

Additionally, the SCN points to a discrepancy between the number of ongoing projects disclosed in the bid (26 projects) and those stated in the Draft Red Herring Prospectus (“DRHP”) filed with NSE on February 20, 2025 (67 projects), which has been treated as a material misrepresentation. Based on these grounds, it may result in forfeiture of bid and/or performance security, and debarment from future JNPA tenders for two years. Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue, it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which

are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalize the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.
